

Rest your eyes. Take the glare out of Google Workspace.

URLflows for Dimming. Private, free, forever.

Transform your screen, not your files.

Live Adjustments

Dim, warm, or invert to a true dark theme instantly on your active page with no reload or flicker.

Zero File Alteration

Everything happens visually on the page you're viewing. Your actual documents, sharing settings, and data remain entirely untouched.

Seamless Integration

Runs locally over Google Docs, Sheets, Slides, and embedded Calendars.

The Trinity of Comfort

Precision Dimming

- Effect — Darkens the bright white page live. Deliberately capped just short of full black to maintain perfect readability.
- Mechanism — 0-100% Slider control.
- Ideal Use — Standard daytime eye-strain relief.

Amber Warmth

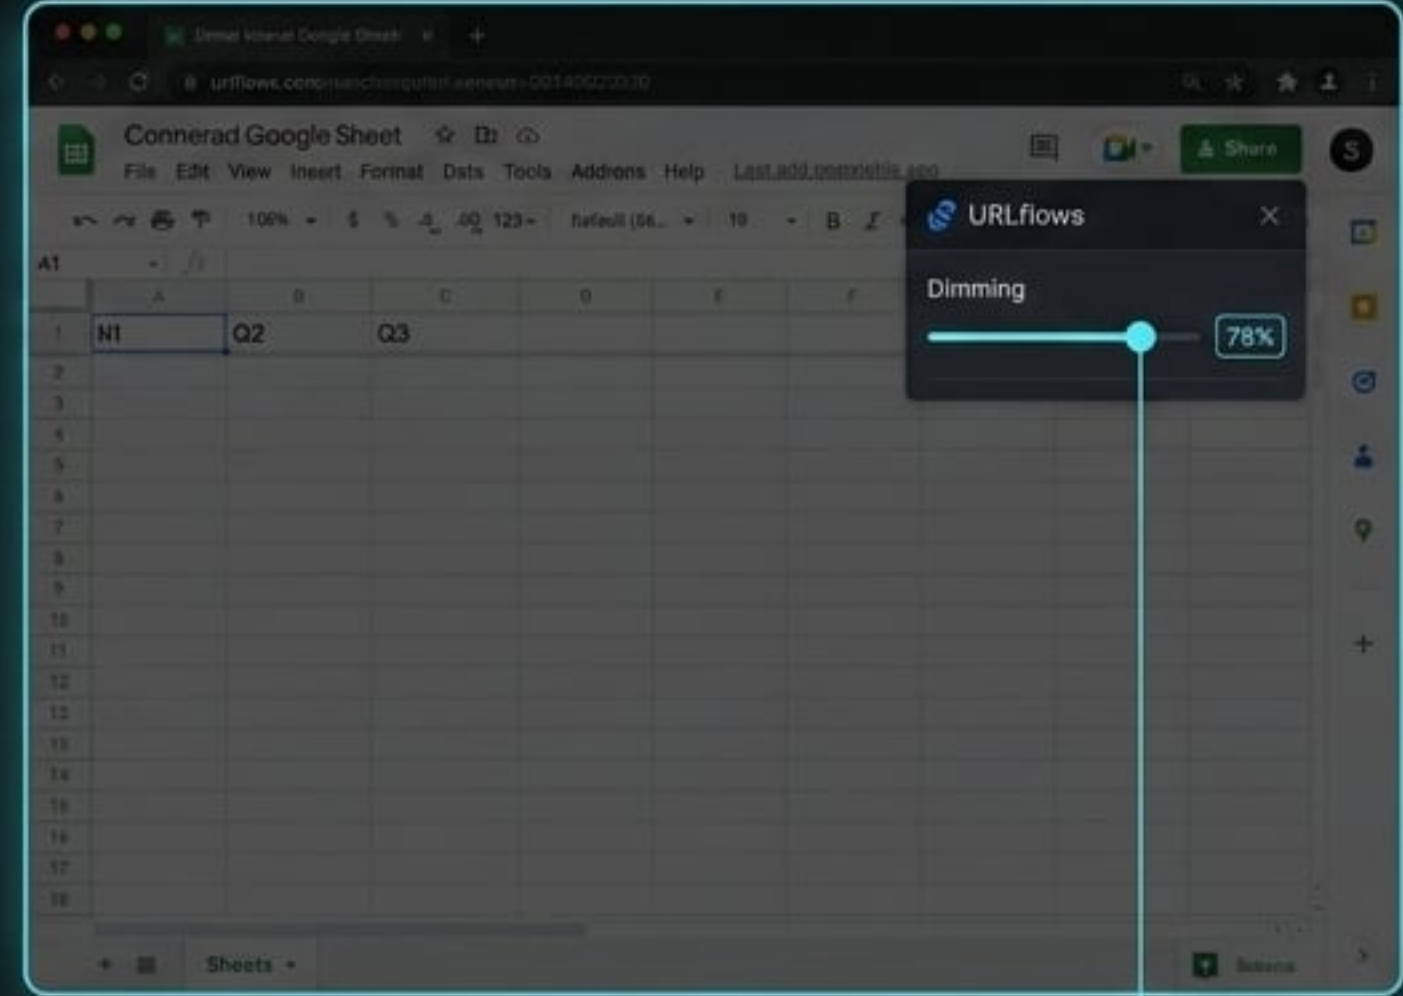

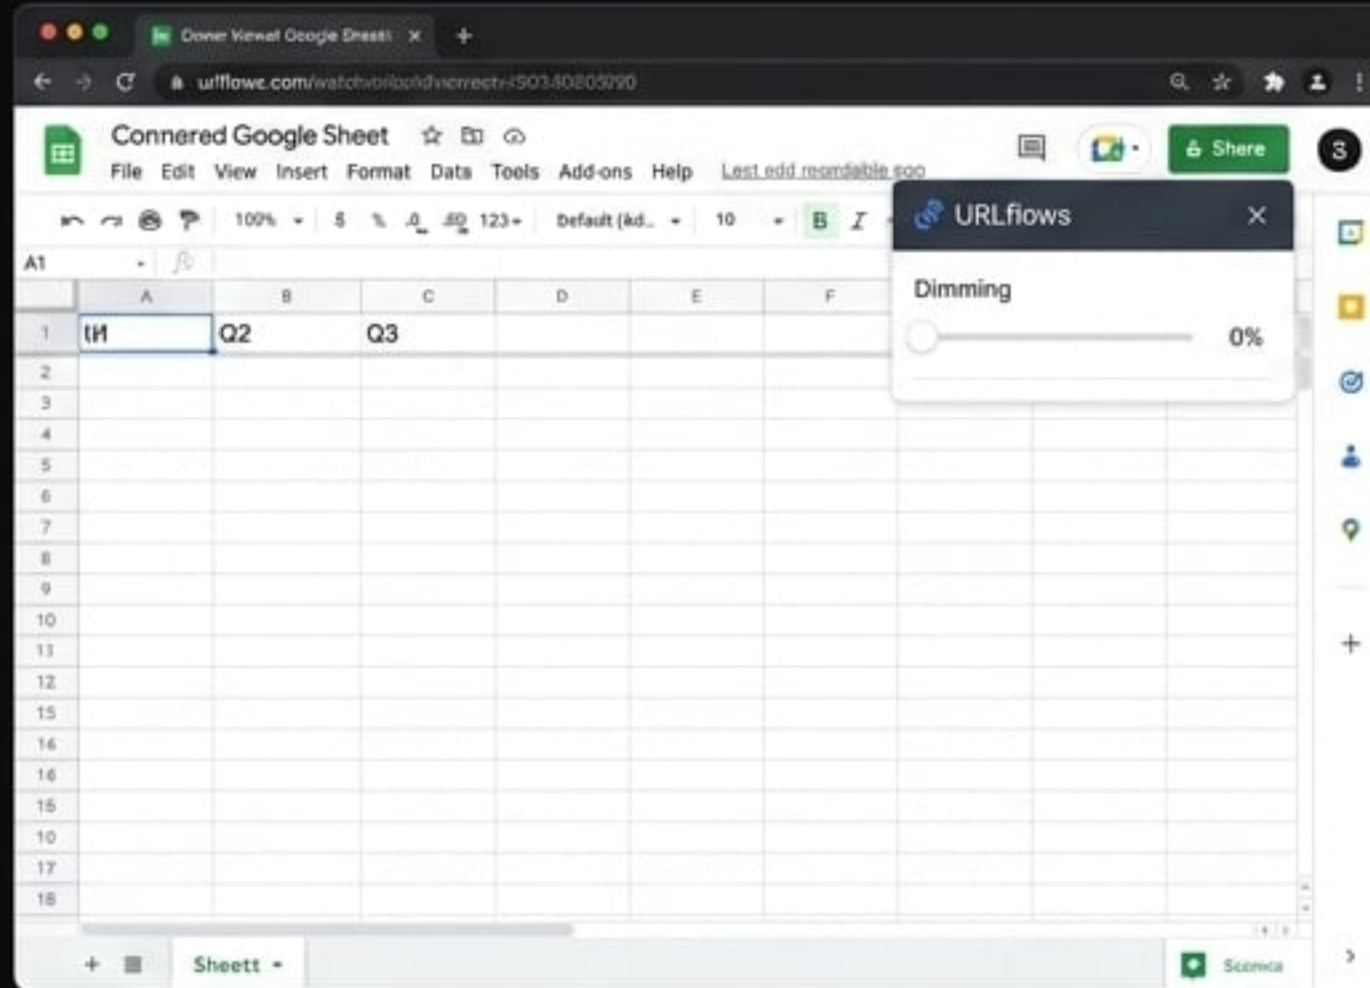

- Effect — Layers a night-light style amber tint over the page to take the edge off cold blue-white light.
- Mechanism — 0-100% Slider control (Starts at 0%).
- Ideal Use — Late afternoon and evening work.

True Dark Mode

- Effect — Inverts the document to a true dark theme (dark page, light text). Combines freely with dimming and warmth sliders.
- Mechanism — Instant Toggle.
- Ideal Use — Full night-time environment.

Dial down the glare with precision.

The current strength is shown instantly.
Even at 100%, the page is capped to stay readable.

Soften cold light with **amber warmth**.

URLflows for Dimming

Dim, wans & darters your amn.

Dimming enabled

ADJUST

Dimming 79%

Warmth 52%

Dark mode

APPLY TO

Decal Sheets Embeds

Embedded calendars

Reset to defaults

Open a Google Page page or an embedded calendar link to see the effect.

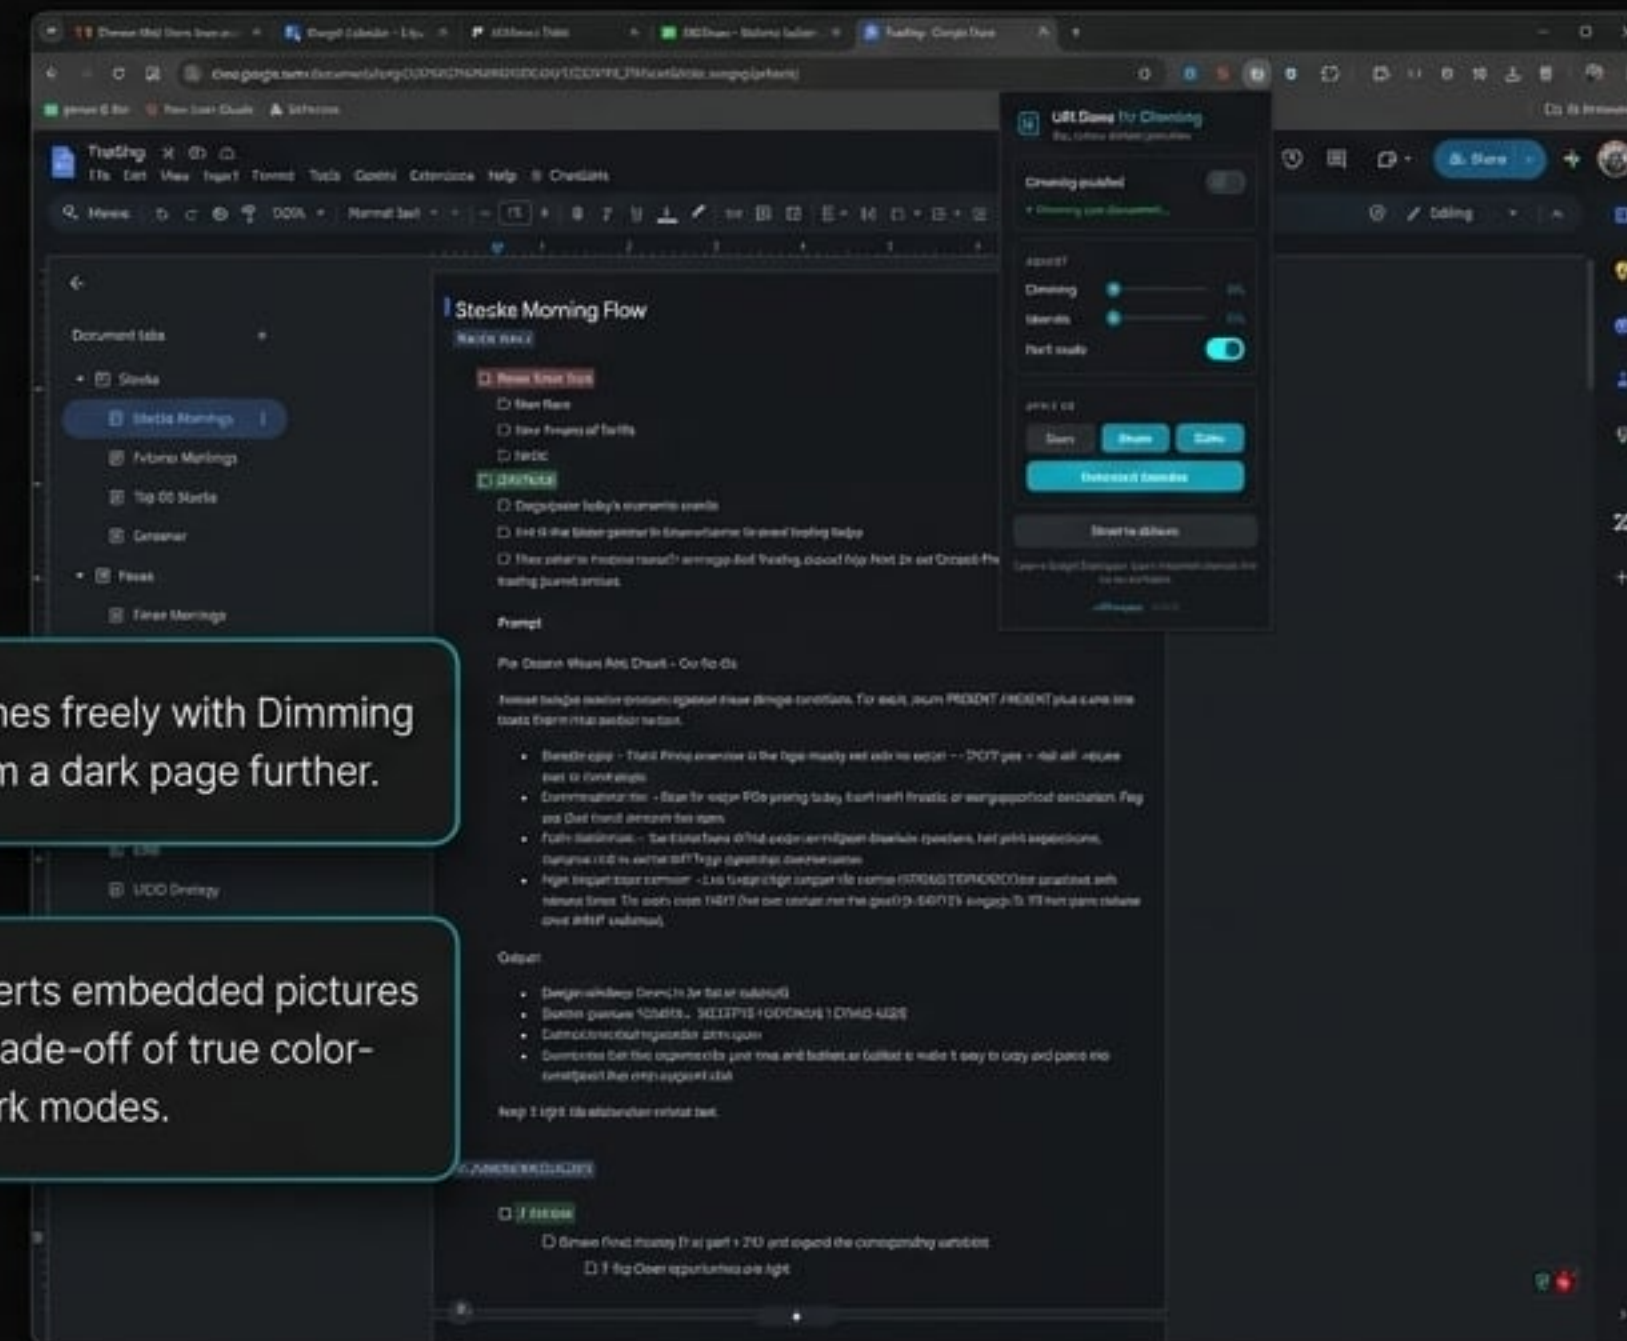

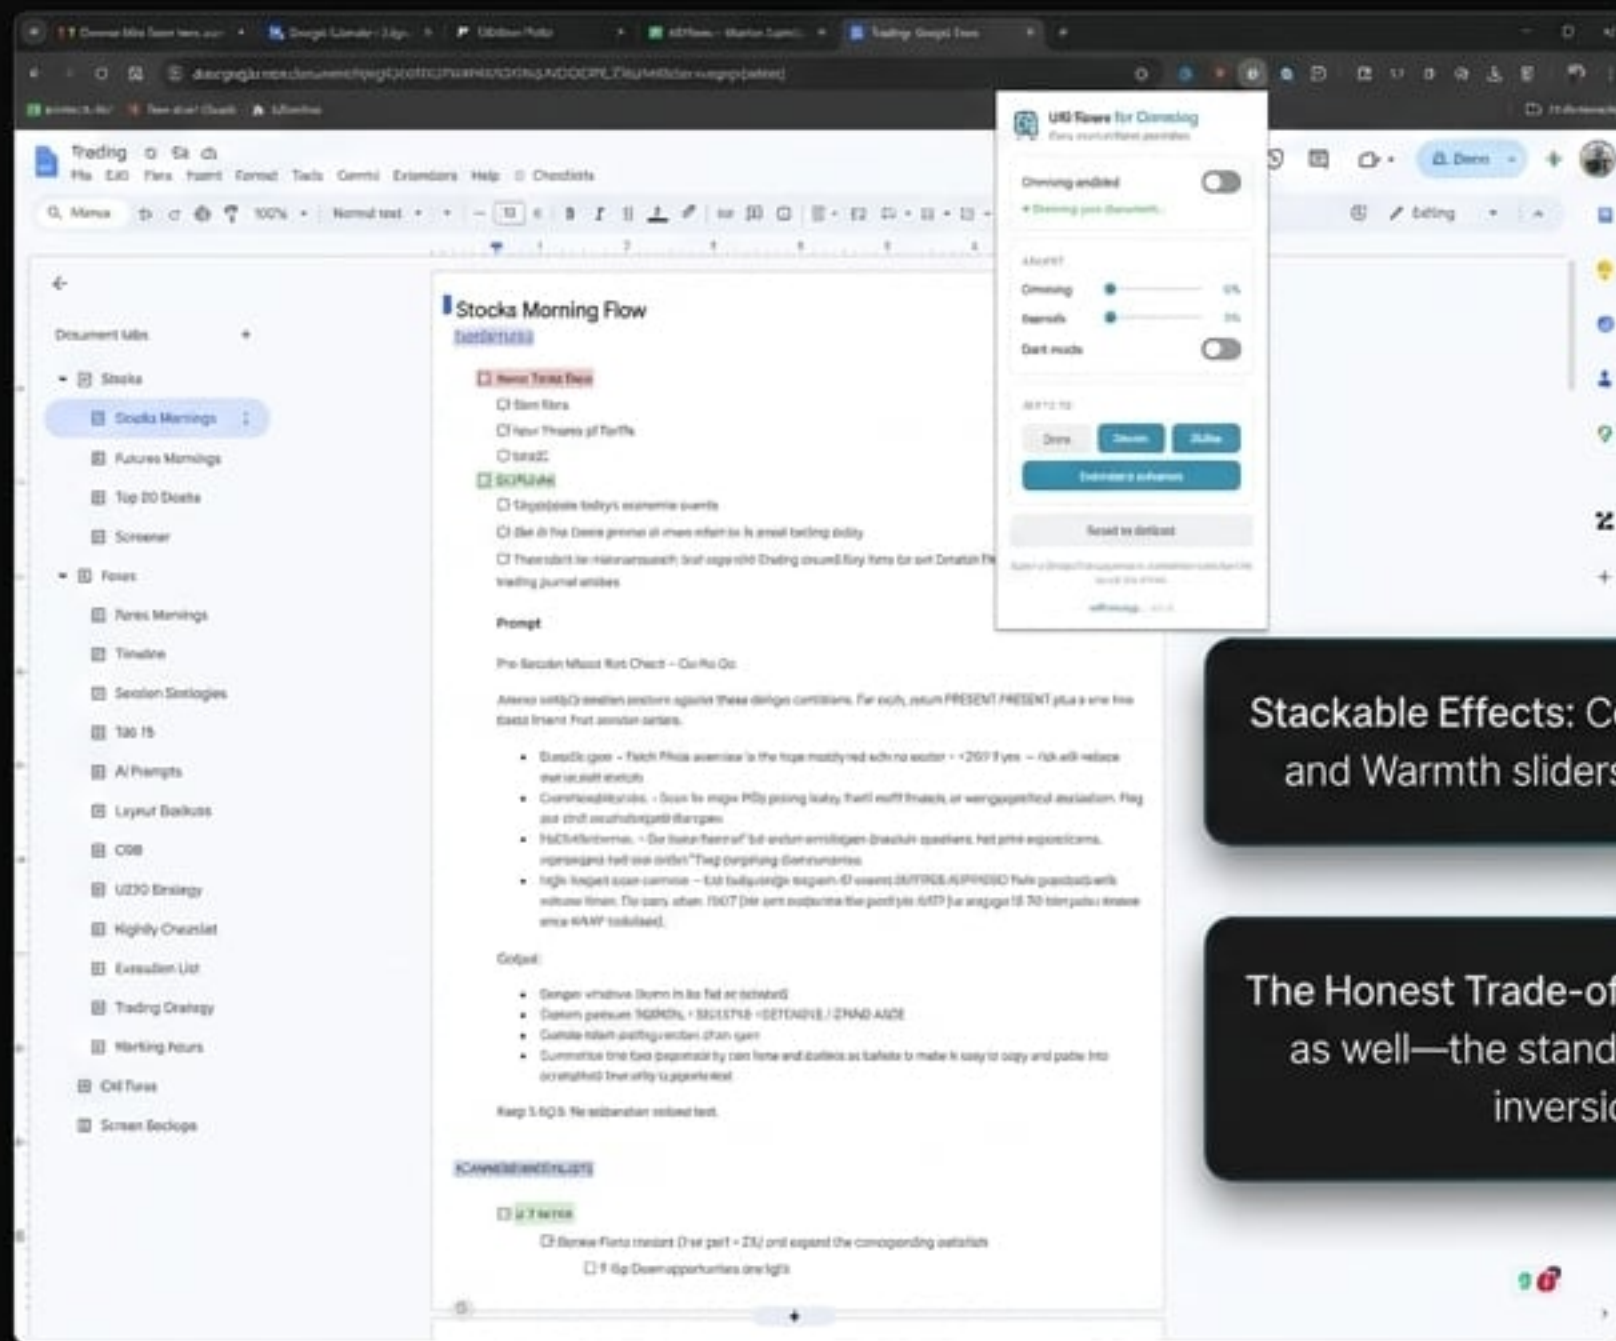

urlflows.app 4.1.2

Starting at 0%, drag the warmth slider to layer a soft amber tint over the page.
It filters out harsh blue light like a gentle night light for your documents.

One click to True Dark Mode.

Before

After

Stackable Effects: Combines freely with Dimming and Warmth sliders—dim a dark page further.

The Honest Trade-off: Inverts embedded pictures as well—the standard trade-off of true color-inversion dark modes.

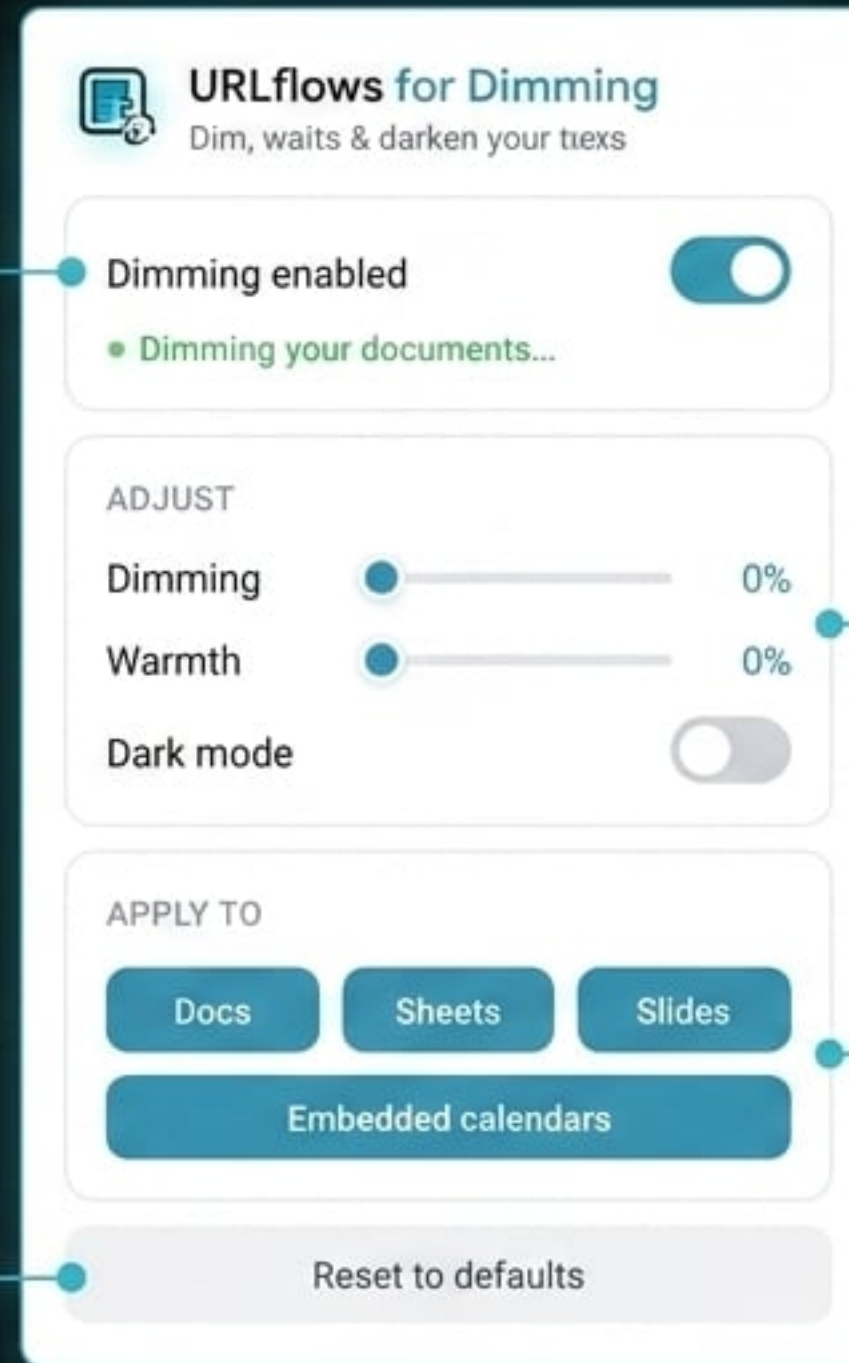

The anatomy of complete control.

The Master Switch.

Pause the entire effect instantly without losing your slider positions.

The Safety Net.

One click to restore out-of-the-box settings (30% dim, no warmth).

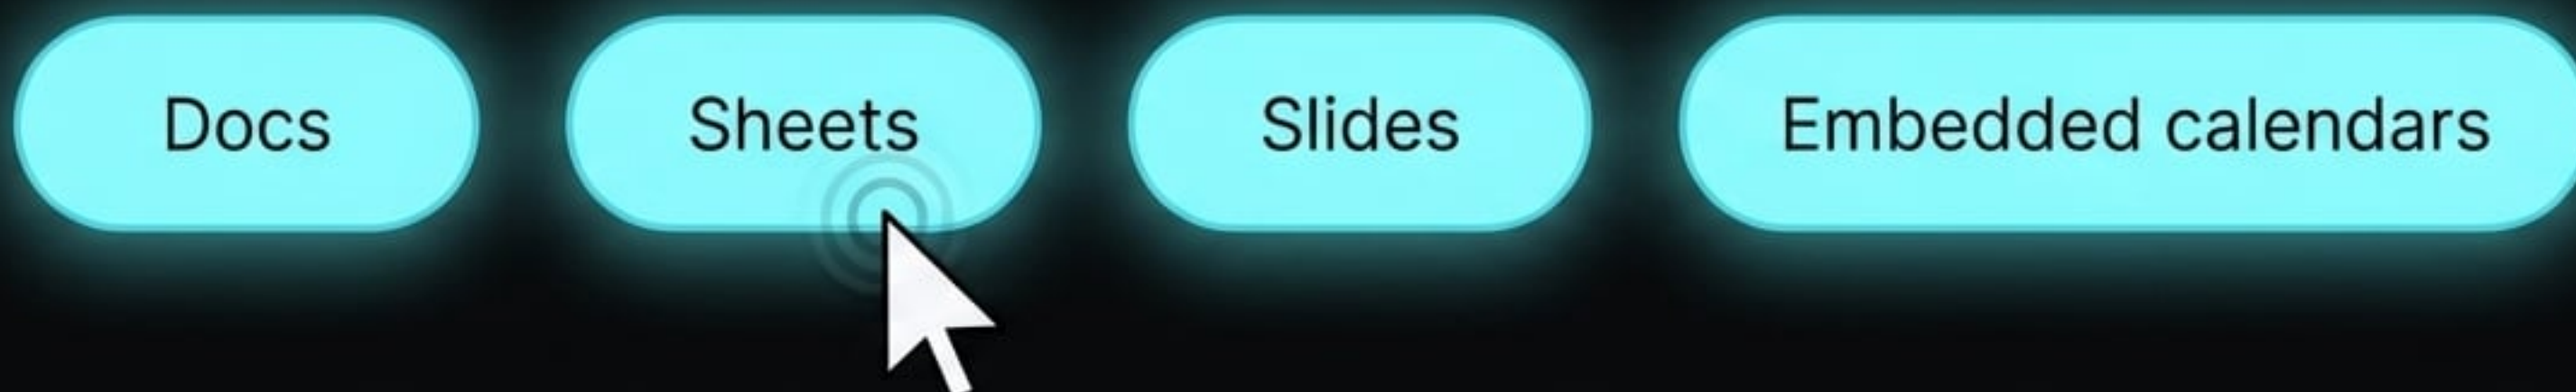

Precision Readouts.

Granular control saved as you drag.

Target Chips.

Isolate effects to specific Workspace apps.

Isolate the effect exactly where you need it.

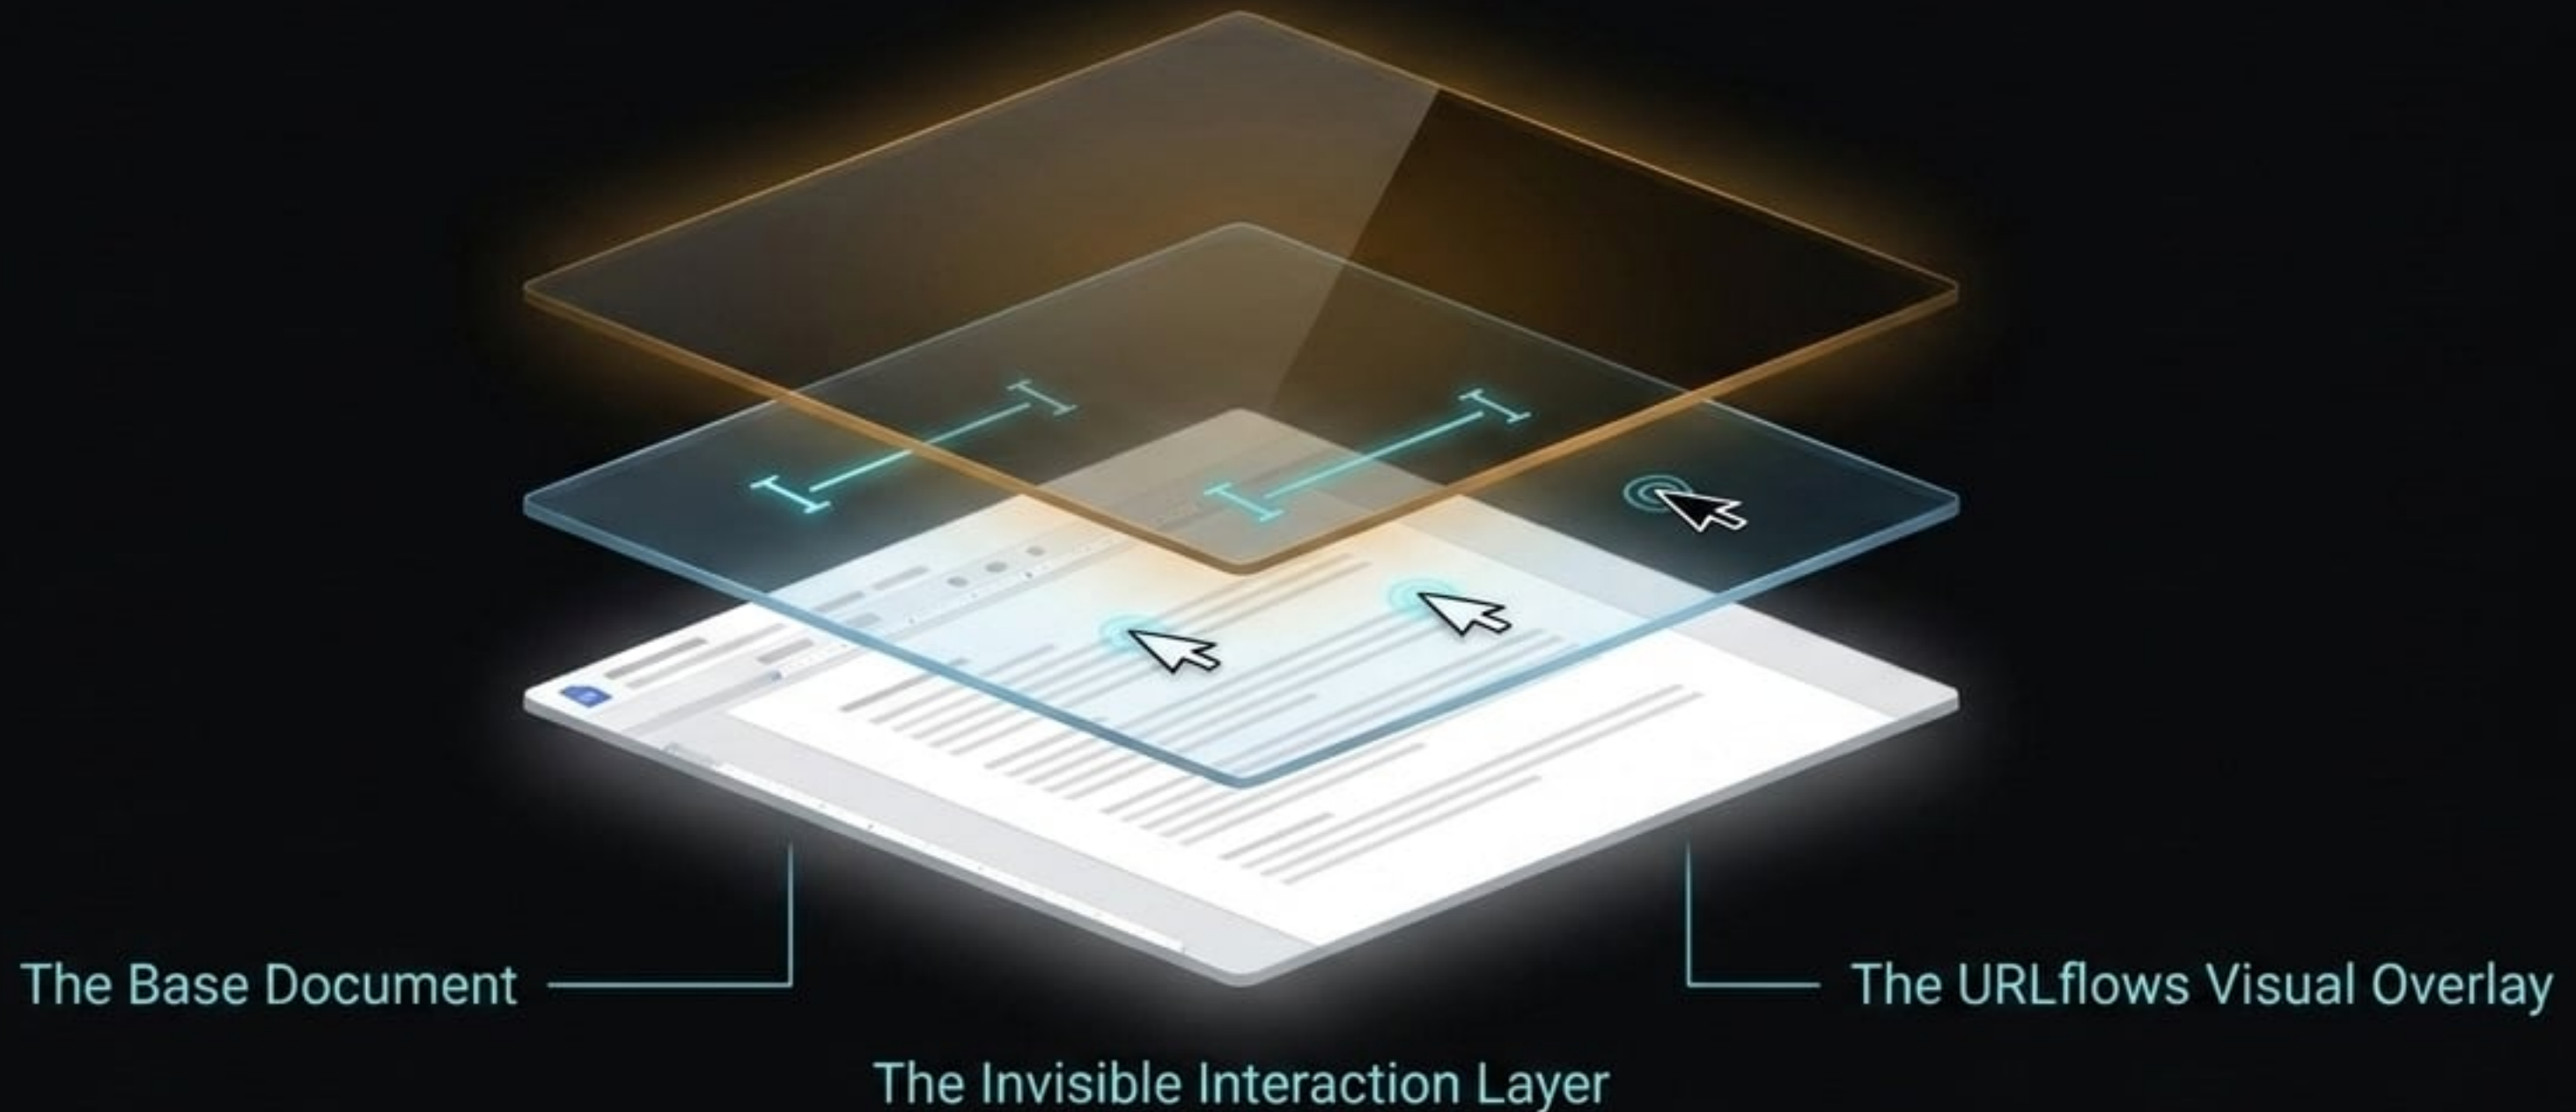

Click a chip to exclude an app without affecting the others.

Applies to public shared/embedded Google Calendar pages posted on websites, not the main Google Calendar app.

Invisible layers. Undisturbed editing.

The effect is drawn as click-through overlays. You interact with the document exactly as you always did. If the page redraws itself, URLflows quietly re-attaches its layers instantly so the effect never drops out.

Private by design. Everywhere you work.

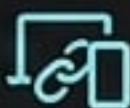

Zero Network Activity

Makes zero network requests. Has no analytics or trackers. Nothing about your browsing leaves your device.

Minimal Permissions

Asks for a single permission—storage—just to remember your settings. Runs exclusively on docs.google.com and calendar.google.com embedded pages.

Seamless Profile Sync

Settings sync automatically through your Chrome profile. Your laptop and desktop stay in perfect lockstep.

Live Application

Changes apply live to all open documents. No page reloads, no flickering.

Three steps to a better screen.

Step 1: Add

Click Add to Chrome (or Edge/Brave/Arc) and confirm the prompt.

Step 2: Pin

Pin it from the Extensions menu so it's always one click away.

Step 3: Adjust

Open any Google Workspace document and find your perfect lighting.

Private, free, forever.

Compatible with Chrome, Edge, Brave, Opera, Arc, Vivaldi, and Chromium-based browsers.
Available on the Chrome Web Store. urlflows.app
