3 subtasks

THE HIDDEN SPRINT

Jira boards hide subtasks one level down. To know what's actually left on a story, you open card after card.

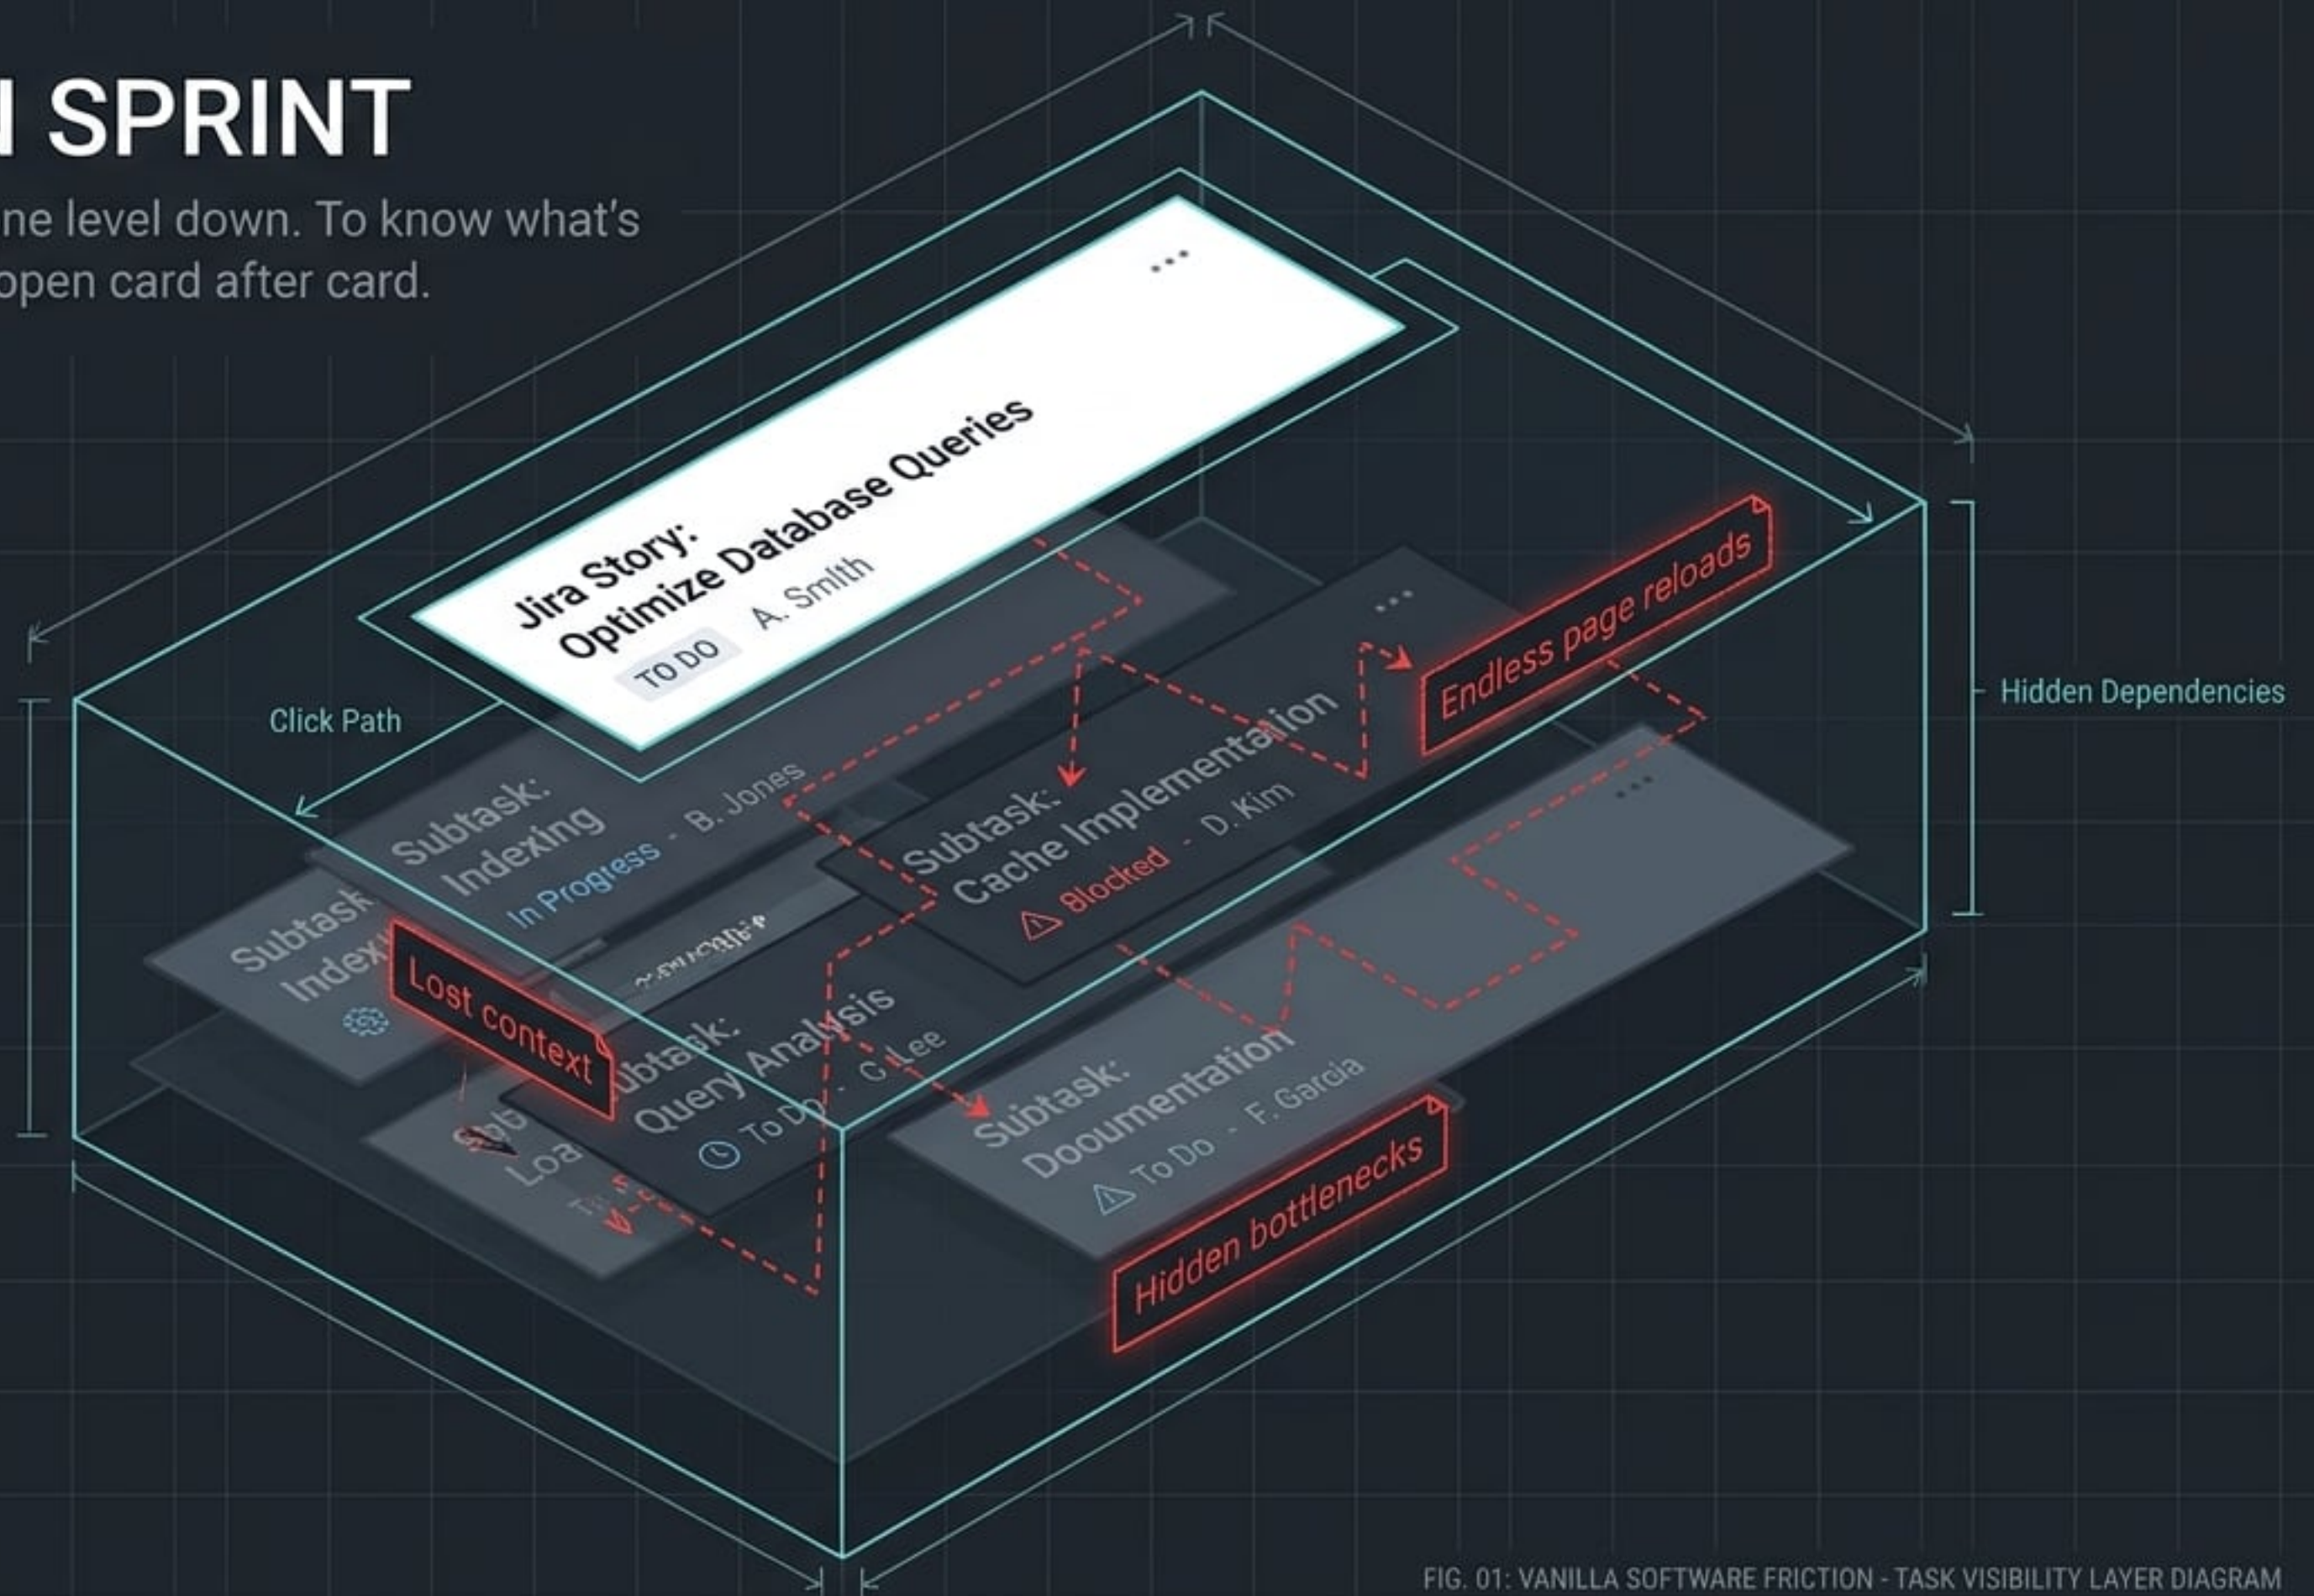

FIG. 01: VANILLA SOFTWARE FRICTION - TASK VISIBILITY LAYER DIAGRAM

Meet the Developer's HUD.

URLflows surfaces subtasks inline, docks your standup notes, and tidies your board—running entirely locally in your browser.

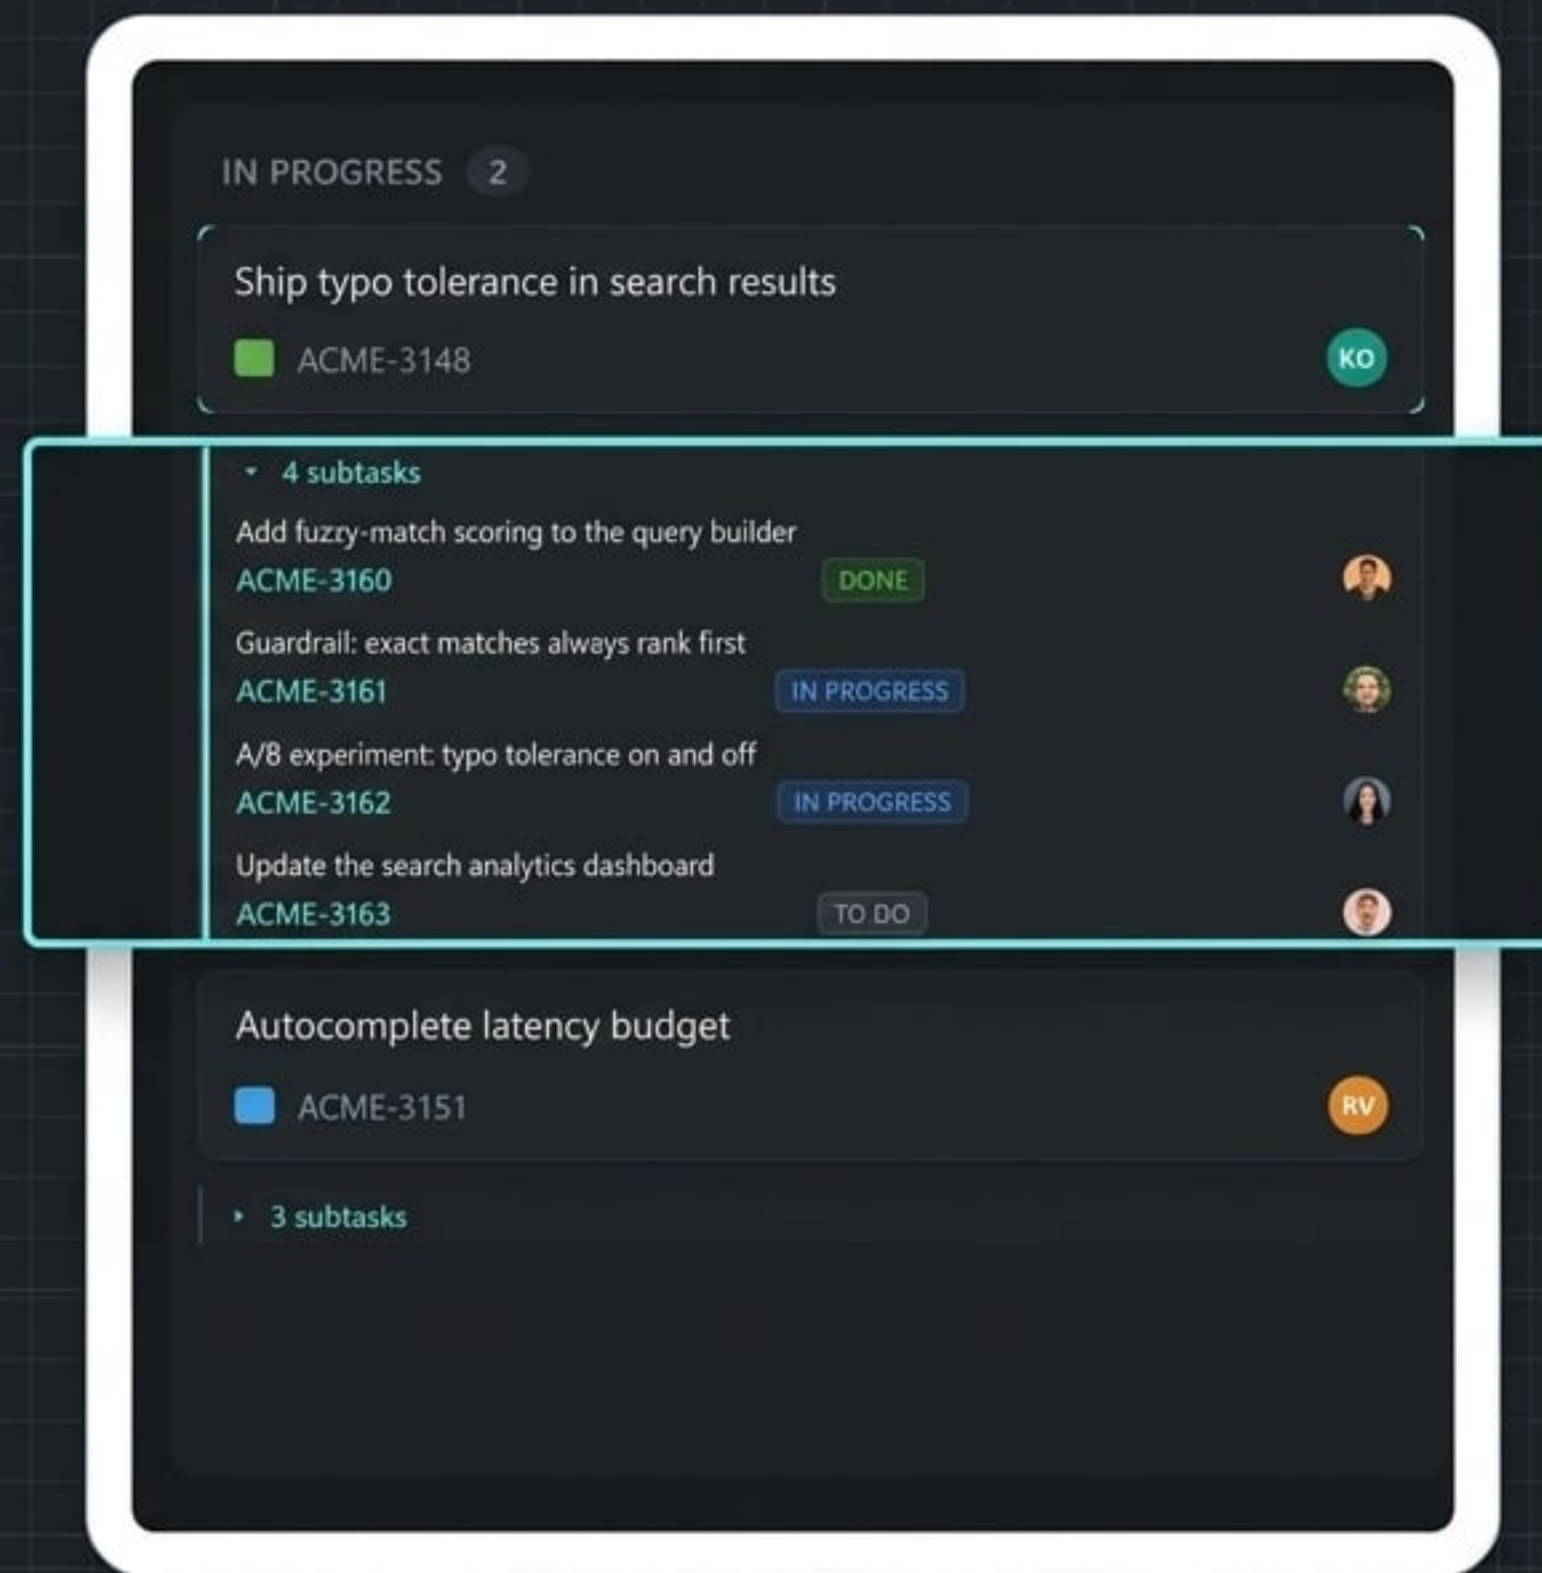

Pillar 1
**Inline
Subtasks**

Pillar 2
**Persistent
Guidance Pad**

Pillar 3
**Focused UI &
Decluttering**

Subtasks, without the click-through.

An editorial X-ray of the inline subtask experience.

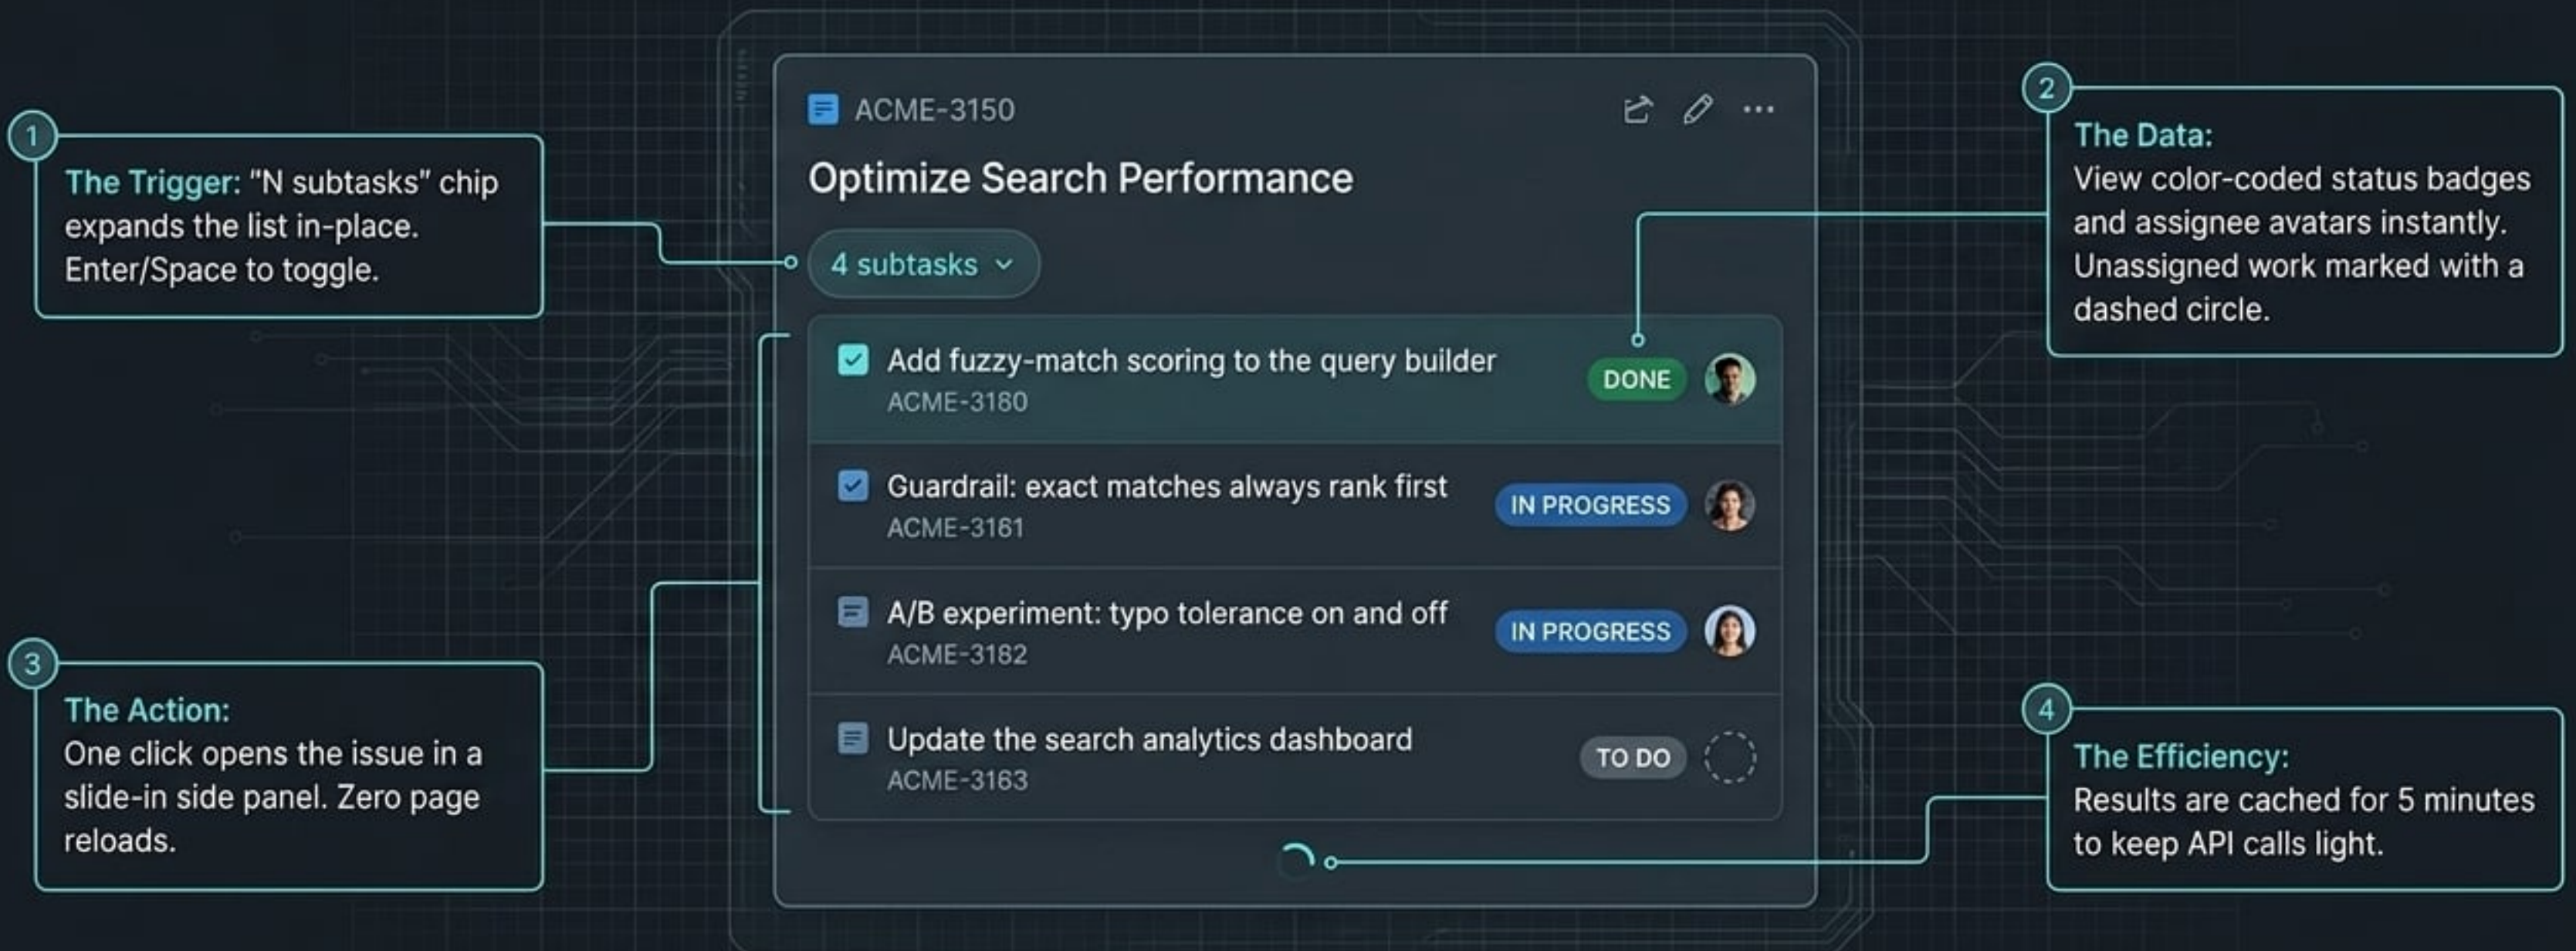

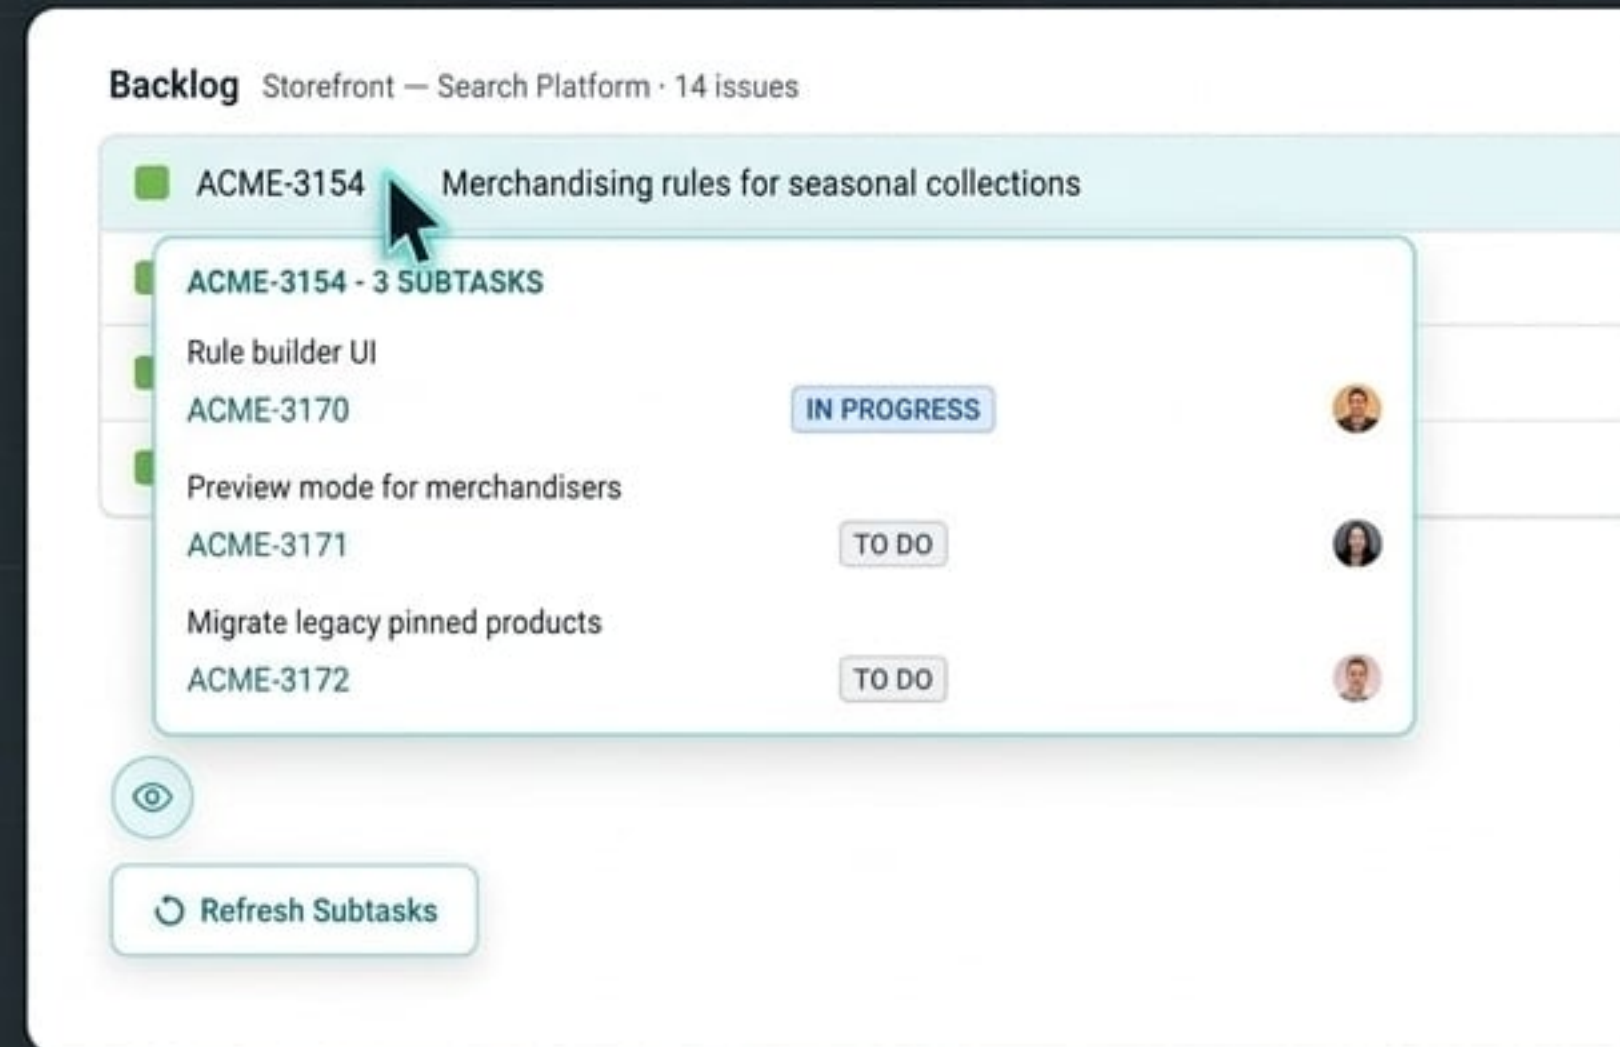

FIG. 03: INLINE SUBTASK ANATOMY & INTERACTION DIAGRAM

Accelerate your backlog grooming.

Hover any issue to see its subtasks instantly. A floating 'Refresh Subtasks' button rescans rows seamlessly as you scroll.

Re-sort your view on the fly.
Order subtasks by:

- Default (Jira order)
- Status (To Do → Done, or reverse)
- Assignee
- Key or Summary

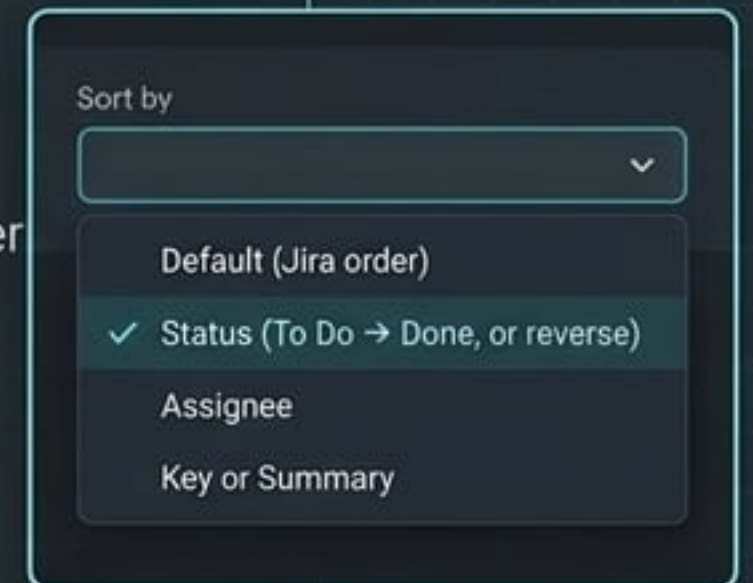

FIG. 04: ACCELERATED BACKLOG & SORTING INTERACTION

The persistent pad. Park it now, pick it up after.

An exploded diagram of the persistent notes and guidance pad.

Autosaving Markdown editor.
Formatting toolbar for standup notes that survive tab changes.

Docking Controls: Park it in one of six grid positions, or free-drag it anywhere on screen.

Scale Controls: On-the-fly text scaling (80% to 250%) so the whole room can read it during a demo.

FIG. 05: NOTES PAD ANATOMY & INTERACTION DIAGRAM

Context when you need it.

A floating pad adapts for how a state-machine.

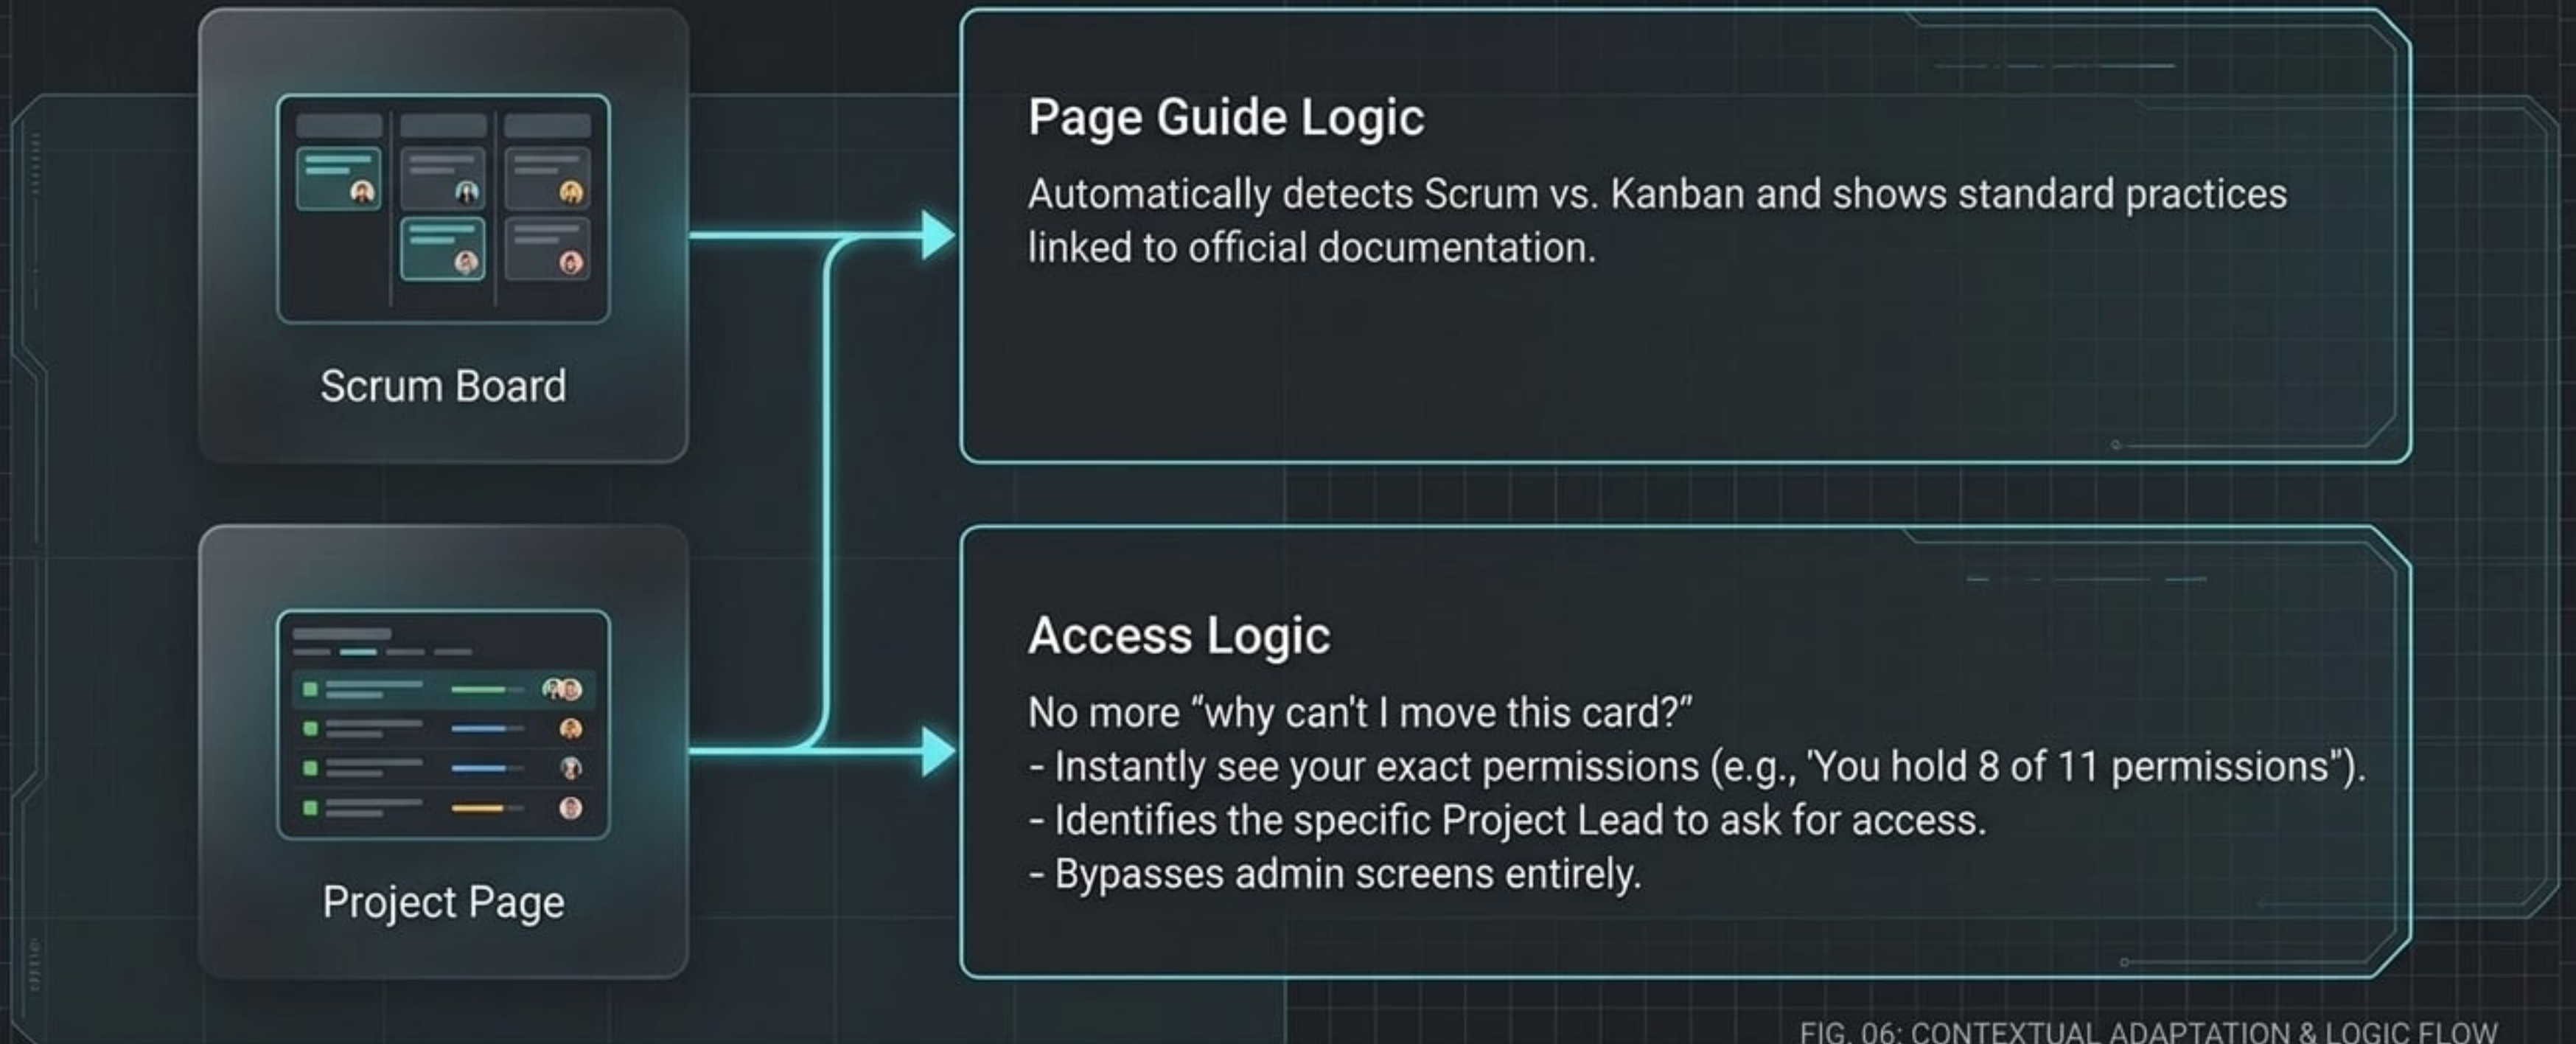

FIG. 06: CONTEXTUAL ADAPTATION & LOGIC FLOW

Hide AI Chat with a single switch.

The native software gives you no built-in way to turn off its floating AI assistant. One toggle hides all entry points, instantly giving you your screen real estate back.

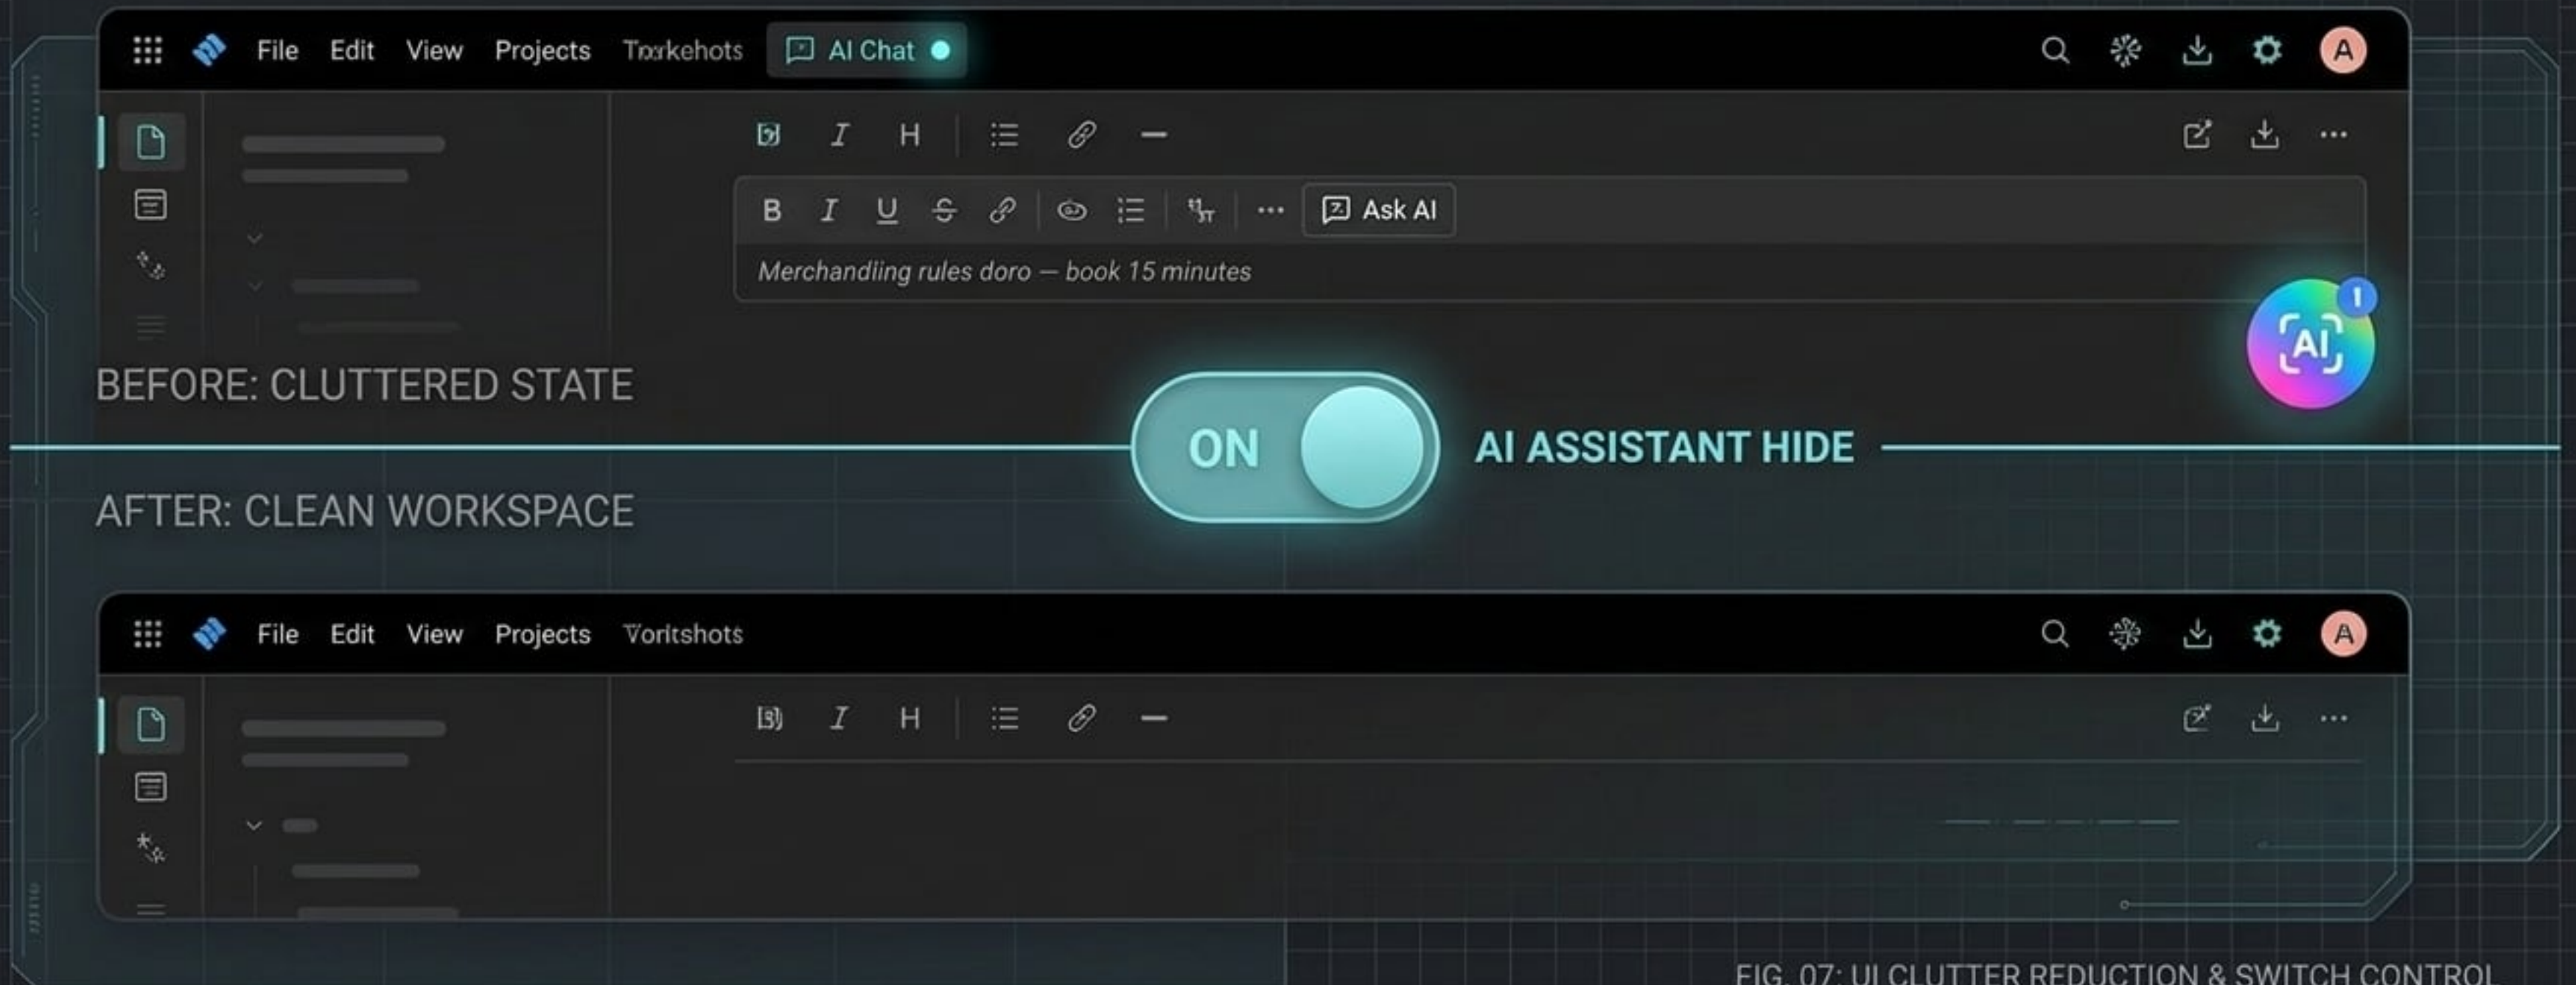

FIG. 07: UI CLUTTER REDUCTION & SWITCH CONTROL

The joy of 'Done'.

- **8 Animation Styles:** Confetti, Fireworks, Shooting Stars, and more.
- **Smart Triggers:** Celebrate any issue, or only issues assigned to you.
- **Custom Statuses:** Automatically discovers statuses on your board.
- **Accessible:** Fully respects OS-level reduced-motion settings.

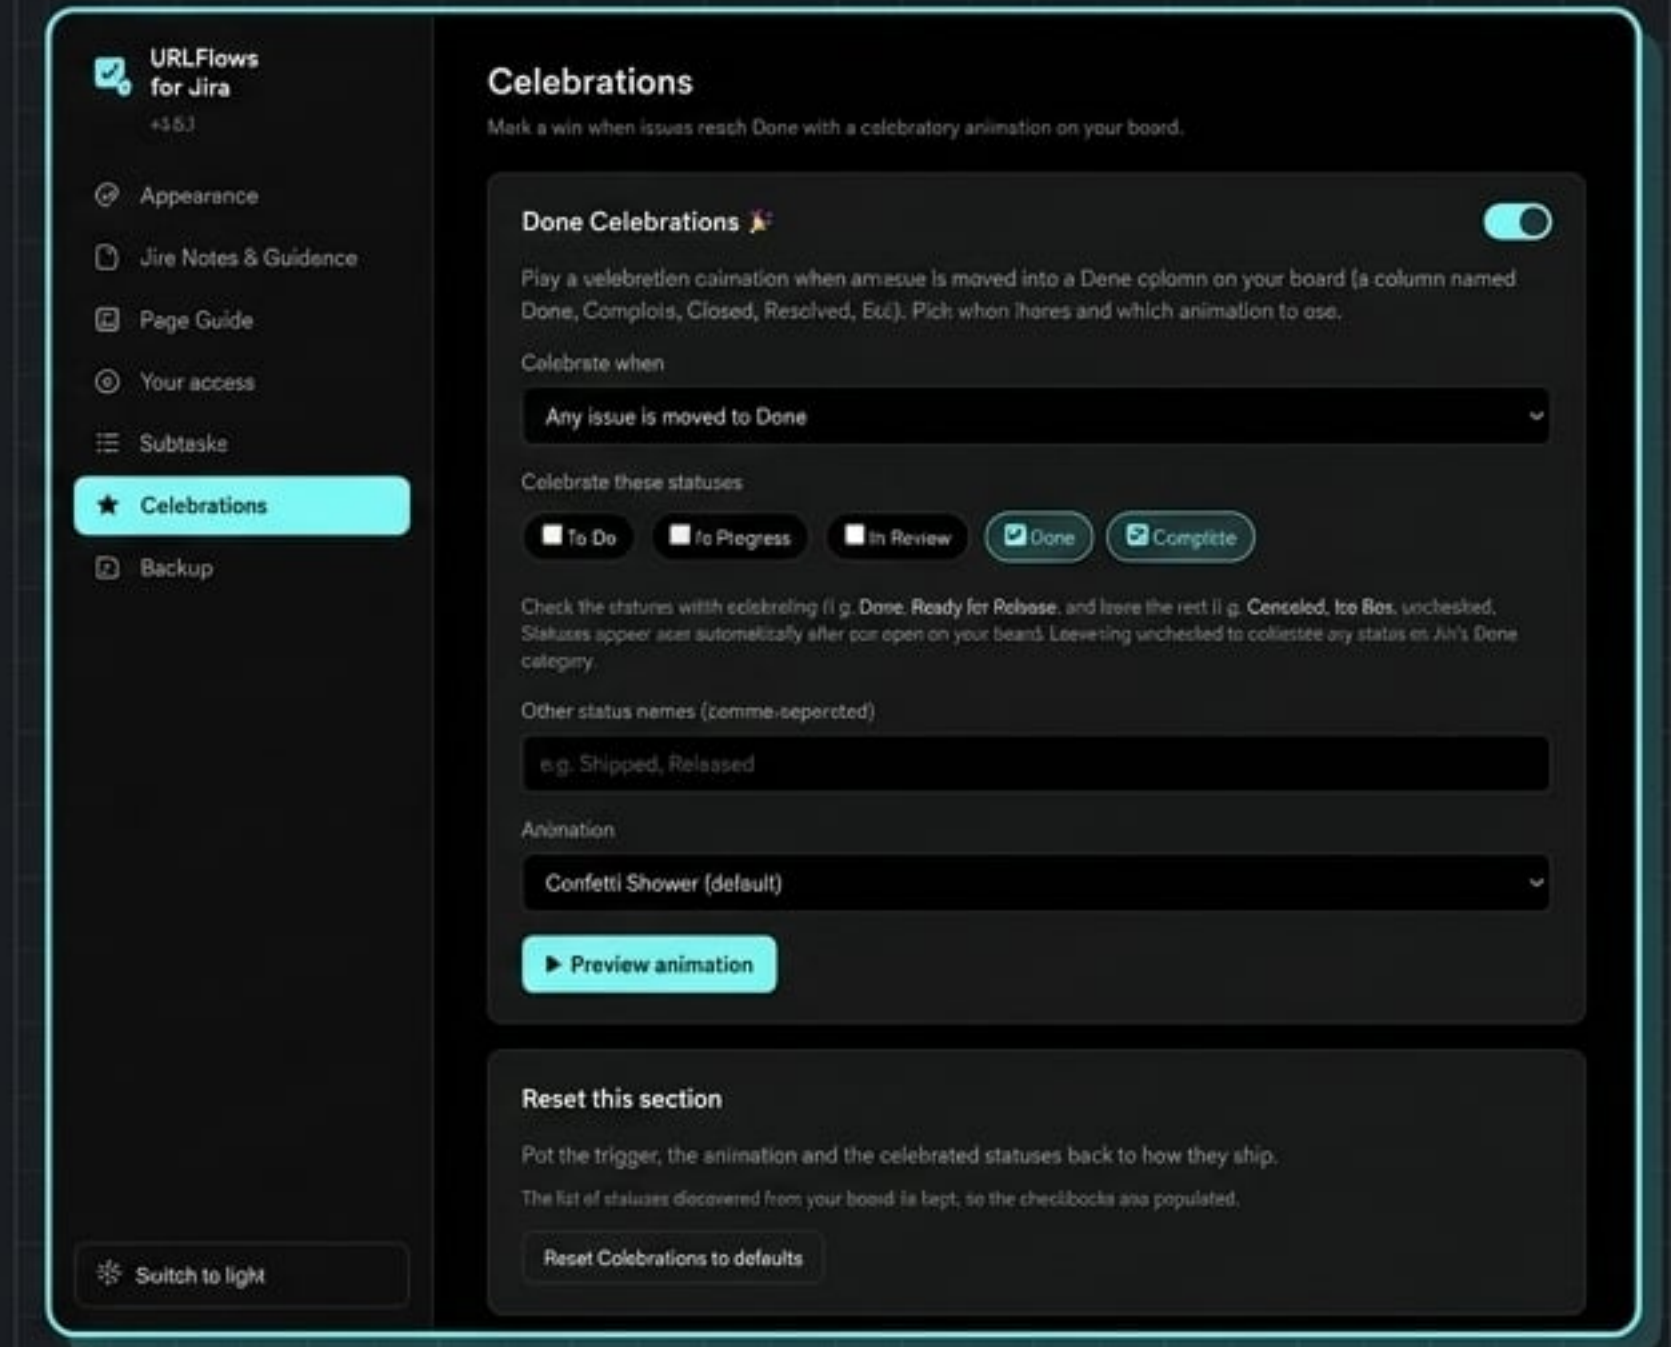

FIG. 08: CELEBRATION SETTINGS & ANIMATION

The Noir Collection. Make it yours.

21 Themes

Featuring pure-black variants: Aqua Noir, Ember Noir, and Viridian Noir.

Automatic Match

Reads the native color mode and seamlessly swaps between your chosen Light and Dark themes.

Hover Highlights

10 distinct pointer highlight styles including Spotlight Ring, Clean Border, and Lift & Shadow.

Readable by Default

Every bundled theme clears strict WCAG AA 4.5:1 contrast ratios.

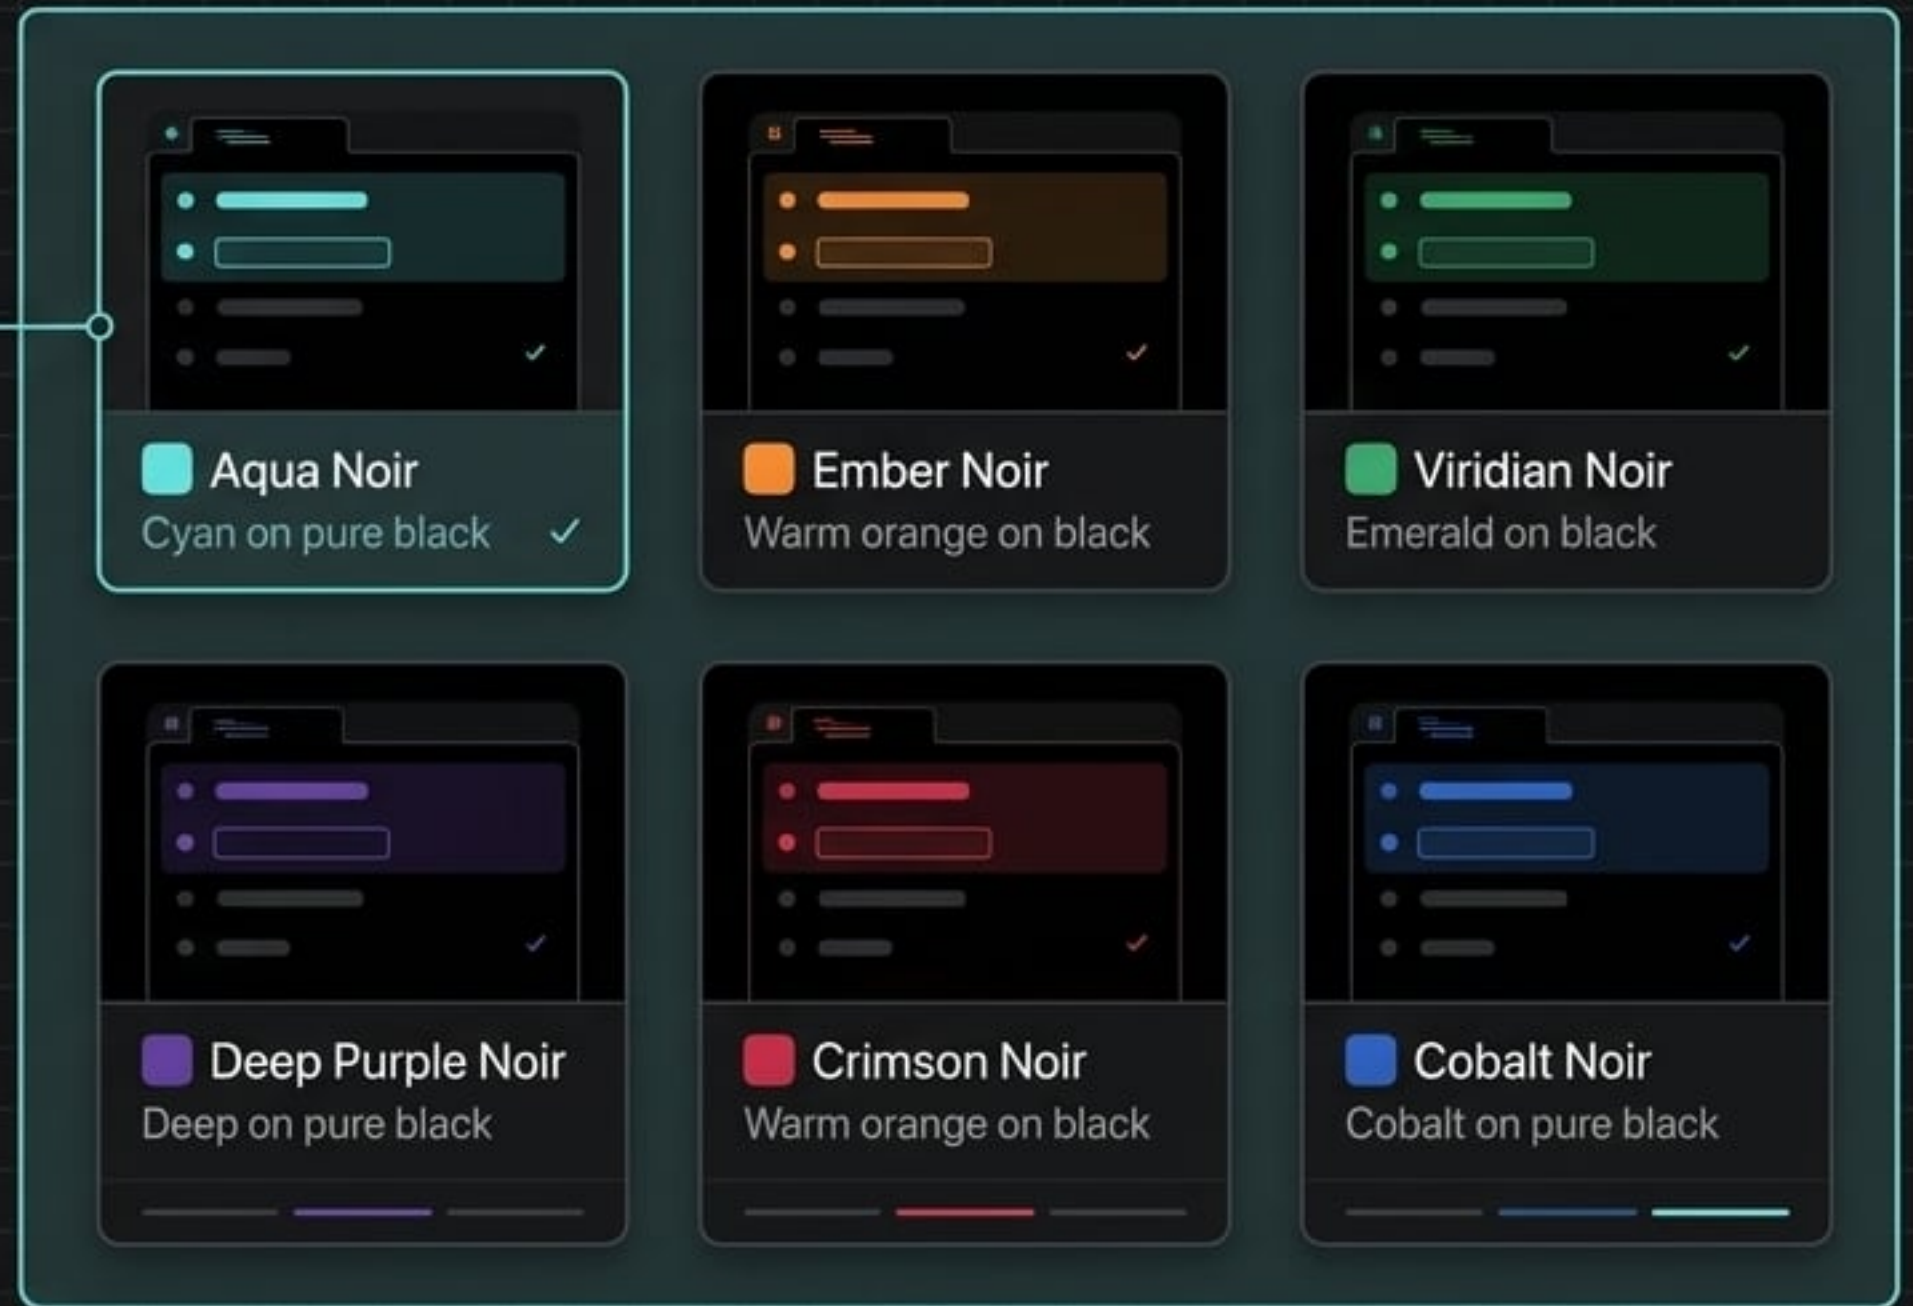

FIG. 09: NOIR COLLECTION THEMES & DETAILS

Privacy by Design. Zero Egress.

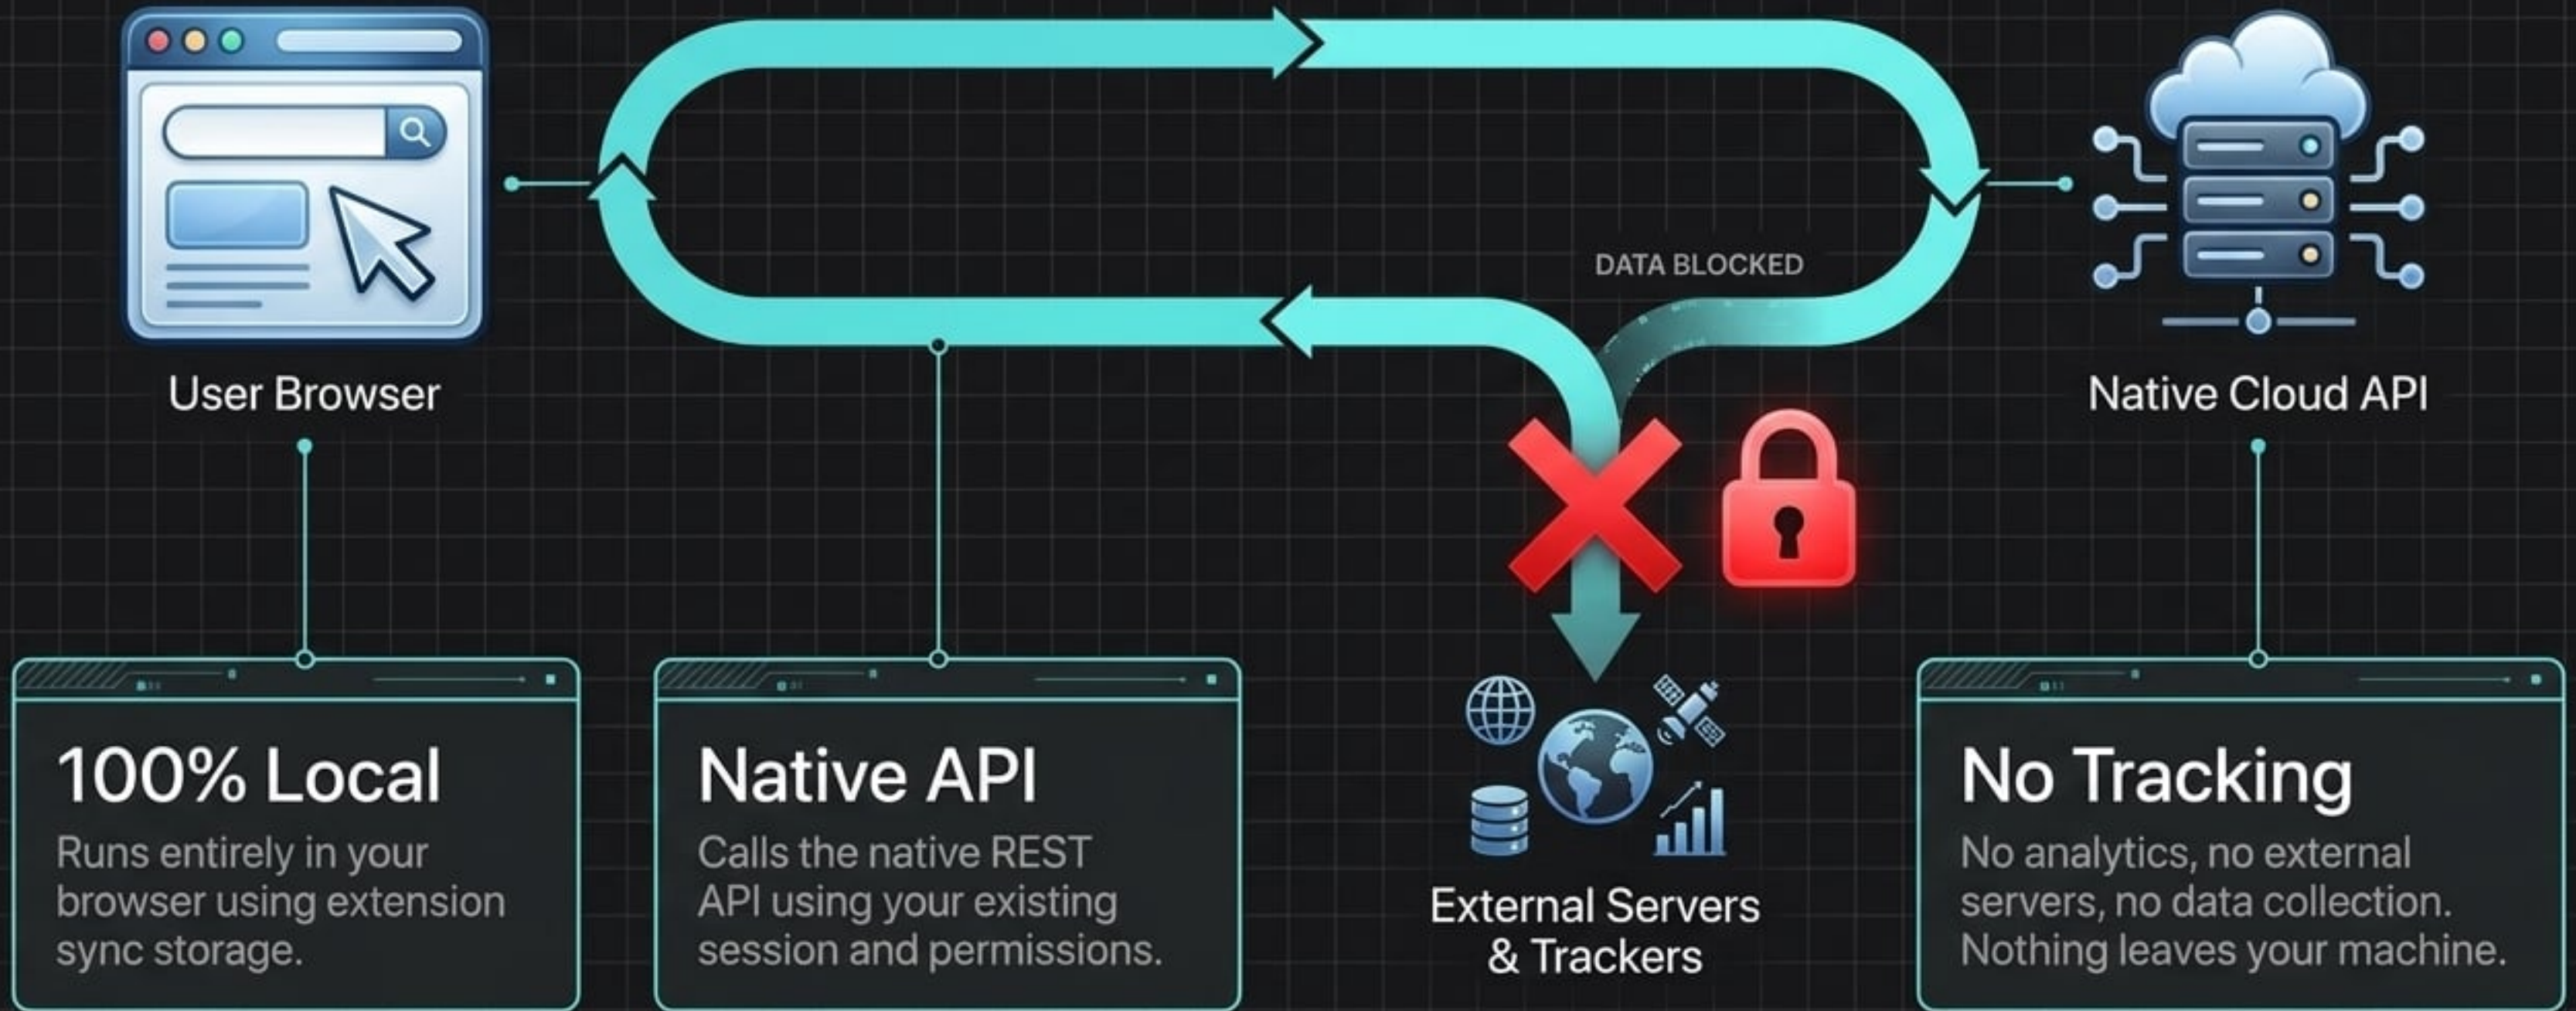

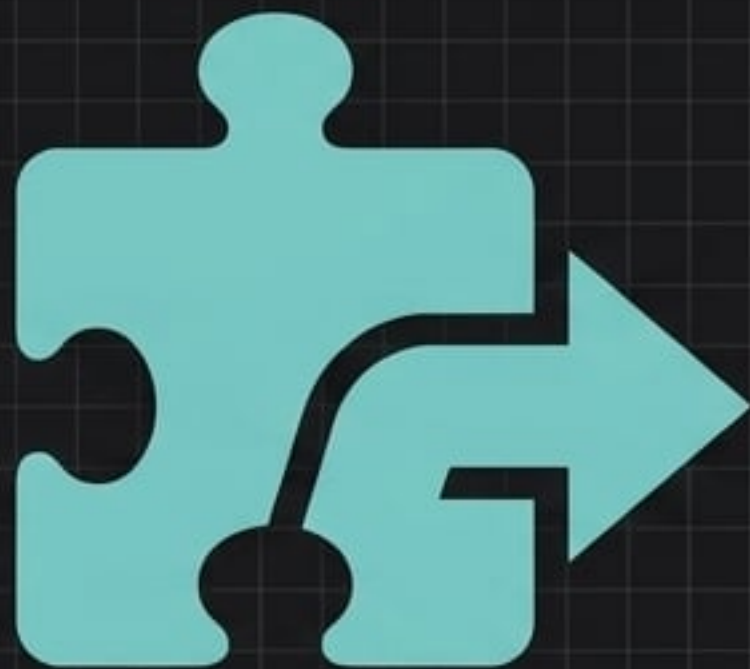

FIG. 10: ZERO-EGRESS SYSTEM ARCHITECTURE & DATA FLOW

Friction vs. Flow

Task	Vanilla Software	Augmented Flow
Viewing 5 subtasks	5 clicks + wait for page reloads ✕	0 clicks (visible inline instantly) ✓
Checking project access	Ask admin or hunt for settings ✕	On-screen natively in the Guidance pad ✓
Taking standup notes	Requires a separate app or tab ✕	Persistent floating pad on every page ✓
Hiding AI Assistant	Impossible ✕	1 simple toggle switch ✓

FIG. 03: FRICTION vs. AUGMENTED FLOW COMPARISON MATRIX

Stop clicking. Start flowing.

Free, forever. No accounts, no sign-ups, no bloat.

Available now on the Chrome Web Store

Install it once and take back your board.
